CITIZENS OF THE YEAR 2020

Grant & Debra McDonald

Darwell, a small hamlet west of Alberta Beach but a place over the years where many kids have been raised, some left, some stayed, and many returned. A place with many activities for various ages.

McDonalds have a long history in the Darwell area. Grant McDonald would be one of them. Grant was raised right in Darwell with many of his cousin's only footsteps away, and many other relatives within a 10 km radius. A chuckle within the family is to find his wife Debra, he had to go north across the tracks.

Grant and Debra have been married for many years, taking over Debra's parent's farm, and over the years they have built a 100+ cow calf operation, and working the hours pertaining to the farm. Grant worked full time for over 30 years at the Sunhills Mine, retiring in 2019. Debra worked for some oil companies and smaller companies in the accounting departments.

But with all of that going on; Grant and Debra found time to volunteer for the Darwell Ag Society, Darwell Seniors and the Darwell Cemetery. The Darwell Ag summer activities are a lot of volunteer hours for many people and always a success. The Darwell Seniors Hall bring a lot of joy. Debra is the treasurer for the Seniors and Grant is always helping with repairs. Same with the cemetery; Debra is secretary/ treasurer and Grant is always there when needed.

Both of us, Grant and Debra, are proud to be from the Darwell area and the atmosphere of the people surrounding Darwell, and hopefully all will continue for many years to come.

Thank you to the Darwell Ag Society for recognizing us but also for acknowledging the many volunteers over the years.

**Our sincere thanks and appreciation to
Grant and Debra McDonald.**

ANIMAL HEALTH CONSIDERATIONS FOR EXHIBITORS

These notes are provided to all exhibitors as guidelines for the health and well being of animals entered at the Darwell Fair. Although testing is not mandatory for many animal diseases exhibitors should consider themselves responsible for bringing healthy animals.

Some considerations for your livestock should include:

Equine – Horses should be vaccinated with a 3 way shot (tetanus, EEE, WEE) as well as Flo/Rhino. Vaccinations should be done within 6 months before the exhibition. Consider de-worming your horse within 3 months before the fair. If your horse has been sick within the previous 10 – 14 days before the fair or had any lymph nodes swelling contact your veterinarian to check the animal before the fair.

Cattle – Cattle should come to the fair free of lice, warbles and ringworm. All of these conditions can be contagious and should be treated before shows to the point where there is no visual evidence of the disease. Cattle should be free of respiratory disease and should show no evidence of lameness from foot rot, corns, etc. Vaccination for cattle diseases such as IBR, BVD, P13 and haemophilus are optional and the exhibitors' veterinarian should be consulted on the treatment and prevention of the above conditions. Cattle should be treated for internal and external parasites at least 7 – 10 days before the fair with a broad-spectrum agent such as Ivomec injectable or pour-on.

The key is to bring healthy stock only. If all exhibitors bring only healthy stock we all benefit by avoiding taking problems home. The above lists are by no means complete, but by observing for common problems we all do our part to make this an enjoyable and disease-free fair.

Helpful Hints for Horticulture Exhibits

The judges will be guided in making their decisions by the printed prize list. Judges will give preference to cultivars correctly named. (Cultivar is a horticultural variety e.g. 'Sunny Vee' is a cultivar of corn). All exhibits must be clean and free of insects and diseases.

Flowers

With the exception of decorative arrangements the flowers are judged for quality. The artistic arrangement of exhibits in Cut Flower classes does not count. Containers such as salad dressing jars work well. Size in the individual blooms is desirable but the quality, form and cleanliness is just as important and should not be passed up in order to pick the largest bloom. Damage to petals will cause the loss of many points.

Gladiolus should have a straight spike and be cut to have the total stem approximately half the length of the flower head. Florets should be evenly spaced and in balance. Measurement refers to diameter of lowest floret.

Roses are considered at their peak just as the second set of petals start to unfurl. A good length of straight stem, carrying some foliage is desirable. The stem should reach the bottom of the container. Side buds must be removed in the Single Rose class.

Sweet Peas should have long stems that are straight and firm. Size, texture, freshness, and number of florets open are important.

Asters, Dahlias, Marigolds and Zinnias should have the centres full (except in the single varieties) and should be free of wilting outer petals.

Pansies should be a uniform size, not touching in the display.

Snapdragon spikes should include no side spikes.
