WHY 10%

- FOR LAND PLOTS
- FOR THE TEAM/MANAGERS
- FOR COMMUNITY (E.G. GIVEAWAYS, TOURNAMENTS, DISCORD, ETC.)

LAND IN LUNACIA

Lunacia is divided up into tokenized plots of land, called Terra, which can be purchased, rented out, and developed by players.

Landholders can upgrade and customize their territory to host shops, Chimera summoning beacons, produce resources, house NPC's, and even act as access points for dungeons!

Independent developers, content creators, and companies will be able to seamlessly build on top of Lunacia using clickable wormholes as a launchpad for this content. The possibilities are infinite!

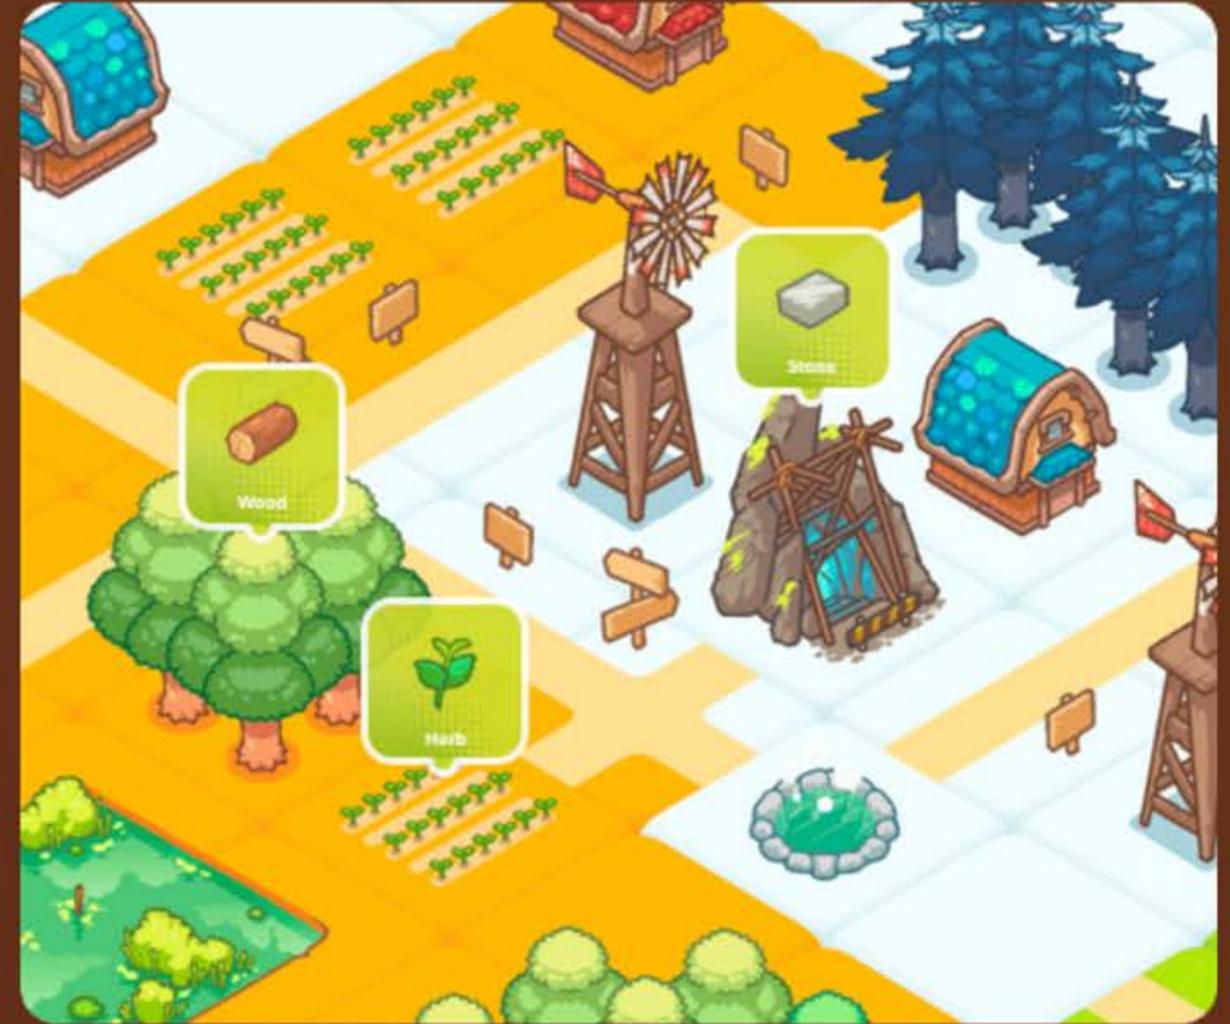

HARVEST - MINE - BUILD

Resources will spawn across Lunacia and be used to upgrade both land and Axies.

Some resources are more likely to spawn in different habitats while other resources are tied to the 7 moons of Lunacia and will only spawn when a certain moon is shining.

Each node will only be able to host a certain number of Axie parties at a time. After a certain amount of time, players will be able to challenge the Axies of another player in a battle to take their spot at the node. Otherwise, Axie parties can wait in line and wait for the parties in front of them to fill up their packs.

REAL-TIME PVE BATTLES

Chimera will be present all across Lunacia, making resource gathering a difficult task. Players will be able to take on Chimera in real-time battles either alone or in groups.

Chimera will drop an assortment of resources, items, and blueprints used to upgrade territory and individual Axes.

PLAY WITH FRIENDS

Form alliances with other players to combine land, pool rare resources, and produce Artifacts - limited edition items that provide powerful guild buffs which can turn a team of adventurers into powerful warlords.
