MAXIMIZING STUDENT GROWTH

## PRESS RELEASE:

### MasterTrack Solutions Announces Release of MasterTrack 4.0

MasterTrack Solutions releases latest version of progress monitoring tool used by elementary schools to track and ensure student mastery on grade level foundational math skills guaranteeing all students are on track to succeed in Algebra.

**Seattle, WA August 8, 2022** – Responding to the mounting pressure on teachers and principals to improve student achievement in elementary mathematics, MasterTrack Solutions announces the release of MasterTrack 4.0. MasterTrack unpacks the K-8 foundational math skills into vertical progressions of specific measurable skills, making it easier for teachers to respond and meet all math learner’s needs.

Many schools don’t know whether their students have mastered grade level foundational math skills until it is too late, usually after the end of year test scores are released. MasterTrack’s progress monitoring and reporting tools work like an early warning system, giving principals and teachers the vital learning feedback they need to make course corrections throughout the academic year—well in advance of the end of year assessments.

“Did you know that algebra is the MOST flunked high school course and one of the most significant indicators of a student’s future success? Students who are unable to complete algebra have **a one in five chance of graduating from high school**” says Torrey Volk, former middle school math teacher and founder of MasterTrack Solutions. “As a former middle school math teacher, I found myself struggling to reach the wide range of learners in my classroom because my students often lacked the foundational skills necessary to succeed in middle school math. Algebra shouldn’t act as a gatekeeper, limiting a student’s dreams. It should be a gateway, helping students realize them. In response, I developed MasterTrack to help K-8 math teachers ensure all students are on track to be successful in Algebra”.

MasterTrack's innovative progress monitoring system and virtual data coaching empower classroom teachers to meet every math learner's needs ensuring all students meet foundational grade level math standards. Schools who use MasterTrack’s formative assessments and data tools to identify and bridge gaps in students’ basic skills have seen dramatic gains in student achievement. Volk states, “Most of our schools see at least 20% gains in student achievement the first year of implementing MasterTrack; one of our MasterTrack schools increased their student scores from 6% to 60% in 3 years!”

MasterTrack Solutions now offers an executive coaching model for school leaders. MasterTrack’s monthly evidence-based coaching helps elementary school principals gather and act upon school-wide formative learning feedback to identify, clarify, and rectify students’ foundational skills every week all year long.

### About MasterTrack

MasterTrack Solutions is a Seattle-based educational technology company dedicated to helping educators and schools maximize student growth in elementary mathematics ensuring all students are on track to succeed in Algebra.
