

Big Rid™

Multi-Purpose Shock Treatment

Big Rid is a concentrated, non-foaming shock treatment for build-ups on milking equipment.

Features and Benefits

- **Concentrated**
Special formula can remove build-ups that conventional cleaners cannot.
- **Removes Barium Sulfate**
Chelating agents will remove barium sulfate deposits.
- **Removes Blacking or Inking**
Removes black stains caused by rubber degrading.
- **Contains Sodium Hydroxide**
This powerful, alkaline agent quickly removes milk fat and protein build-ups from the system.
- **Liquid Formula**
No mixing problems as compared to powdered shock treatments.
- **Prevention Capabilities**
Can be used on a regular basis to prevent scale deposits from forming.
- **Safe**
Non-corrosive when used as directed.
- **Biodegradable**
Dissipates in sanitary systems.
- **100% Customer Satisfaction**
All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.

Big Rid™

Multi-Purpose Shock Treatment

Directions for Use

C.I.P. Treatments:

Following the removal of milk residue from the pipeline or milk storage tank, mix 5-6 oz. (150-180 ml) of Big Rid to each gallon (3.8 L) of hot 160°F (71°C) water and circulate for 10-15 minutes or until the wash solution temperatures drop below 120°F (49°C). A second treatment may be required if all scales have not been adequately removed.

Manual Treatments:

Remove all milk residues and prepare a solution by mixing 6 oz. (180 ml) of Big Rid to each gallon (3.8 L) of hot water. Apply the mixture to the surface that you wish to clean and allow for a 20-30 minute contact time, rinse thoroughly and drain. If quick removal is desired, brushing will be required.

Product Properties

Appearance:	Clear red liquid (turns brown with age)
Odor:	Mild, ammonia-like
pH:	12 (1 oz./gal.)
Specific Gravity at 77°F (25°C):	1.3 (water = 1)
Foam:	None
Rinsibility:	Good
Solubility:	Complete at recommended use dilutions
