

# PediCuRx<sup>®</sup> Complete

## Topical Foot Treatment or Footbath Additive

PediCuRx Complete is a multi-use product for use as a footbath additive, or topical treatment.

### Features and Benefits

- **Patented Formula**

PediCuRx Complete contains the patented Tri-Plex formula which has been shown to be effective in reducing the prevalence and incidence of digital dermatitis.

- **Multiple Use Product**

Patented formula allows PediCuRx Complete to be used as a stand alone product, as an additive to a footbath, or as a topical hoof treatment, applied either in a hoof wrap, or in a topical spray.

- **Non-Antibiotic Treatment**

PediCuRx Complete offers a non-antibiotic treatment option, thereby eliminating the risk of antibiotic contamination of the milk, or the development of resistant strains of pathogens.

- **Easy to Use**

The liquid formula is easily added, manually, to a treatment footbath, or it can be dispensed automatically through the programmable PediCuRx foot care management system.

- **Low pH**

PediCuRx Complete maintains a low pH in the footbath solution for maximum effectiveness.

- **100% Customer Satisfaction**

All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.

# PediCuRx® Complete

Topical Foot Treatment or Footbath Additive

## Directions for Use

**Topical Treatment:** Use at full strength. Do not dilute. For most effective results, thoroughly cleanse infected areas with water prior to treatment. Apply product using a garden-type hand pump sprayer or other suitable sprayer. Spray liberally to heel and interdigital space (cleft) and other areas where visible lesions are present. Apply once daily for a full 10 days. If lesions reappear, repeat treatment.

**Footbath Application:** Dilute 1 gallon (3.78 L) of PediCuRx Complete per every 50 gallons (189 L) of water in the footbath. Solution should be changed after every 150 to 250 cows have walked through the footbath, depending on soil load conditions.

## Product Properties

<b>Appearance:</b>	Clear blue liquid
<b>Odor:</b>	Mild
<b>pH:</b>	3.0 (1% solution)
<b>Specific Gravity at 77°F (25°C):</b>	1.11
<b>Solubility:</b>	Complete at recommended use dilutions
