

Pfite[®]

Chlorinated Caustic C.I.P. Detergent

Pfite is a premium, heavy-duty, chlorinated, caustic powder formulated with low-foaming surfactants for use in C.I.P. and spray cleaning, using soft to hard water.

Features and Benefits

- **Superior Detergent Action**

Powerful ingredients quickly remove milk proteins and milk fat on contact.

- **Powerful, Large System Cleaner**

High-alkaline, caustic formula works well in large, hard-to-clean systems.

- **Shock Treatment Capabilities**

Excellent for use as a shock treatment in milking systems with milk soil build-ups.

- **Contains Anti-Corrosive Agent**

Minimizes the potential of damage to milking system components.

- **Dissolves Quickly**

Quick-dissolving formula maximizes product utilization.

- **Rinses Quickly**

With low-foaming qualities, Pfite rinses free with no residue.

- **Stable Formulation**

One year shelf life offers stability advantage over liquid C.I.P. detergents.

- **Safe**

Safe to use. Non-corrosive to stainless steel, glass, plastic, or rubber parts when used as directed.

- **Environmentally Friendly**

Biodegradable and dissipates in sanitary systems.

- **100% Customer Satisfaction**

All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.

Pfite®

Chlorinated Caustic C.I.P. Detergent

Directions for Use

For cleaning pipelines:

1. Rinse pipeline with clean, warm 110°F (43°C) water immediately after use or as soon as tank is emptied.
2. Prepare a wash solution in hot 160°F (71°C) water. The amount of Pfite required for proper cleaning is related to water quality and system design.
Recommended dilution rates are indicated in the use concentration chart. Circulate wash solution for 10 minutes or until temperature drops below 120°F (49°C).
3. Follow with an acidification rinse using a GEA Farm Technologies acid and drain thoroughly.
4. Prior to milking, sanitize with a GEA Farm Technologies sanitizer according to local health department regulations.

For cleaning milk tanks:

1. Rinse pipeline with clean, warm 110°F (43°C) water immediately after use or as soon as tank is emptied.
2. Add Pfite at 1 oz. (28 gm) to each two gallons (7.6 L) of hot 160°F (71°C) water. Spray wash solution for 10 minutes or until temperature drops below 105°F (40°C).
3. Follow with an acidification rinse using a GEA Farm Technologies acid and drain thoroughly.
4. Prior to milking, sanitize with a GEA Farm Technologies sanitizer according to local health department regulations.

WARNING: Do not use on aluminum, zinc, tin, galvanized iron or other soft metals. When mixing, add slowly to water while agitating solution. Keep container closed and dry.

Dilution Table

Water Hardness Range (grains/gal. of water)	Ounces of Pfite to gallons of water (oz. : gal.)	Grams of Pfite to liters of water (gm : L)
0-12	1:3	28:11.3
13-18	1:2.5	28:9.5
19-24	1:2	28:7.6
25-29	1:1.5	28:5.7
30+	1:1	28:3.78

Product Properties

Appearance:	Free-flowing white powder
Odor:	Chlorine
pH:	12.5 (1oz./2 gal. water)
Density Loose:	8.9 lb./gal. (66.4 lb./cu.ft.)
Density Packed:	9.7 lb./gal. (72.4 lb./cu.ft.)
Foam:	Low, suitable for C.I.P.
Rinsibility:	Free rinsing
Solubility:	Complete at recommended use dilutions
