**UPGRADE YOUR
LABELING PROCESS
TO THE 21st CENTURY
WITH THE TEKaLABEL**

AuthenTEK's TEKaLabel is the ultimate turnkey system that includes all necessary controls and software. It's designed to streamline your labeling process, allowing you to label products with ease and accuracy.

The system is equipped with advanced verification technology that ensures your labels are printed correctly every time. Additionally, the TEKaLabel offers multi-label processing, allowing you to print multiple labels at once.

With the TEKaLabel, you can expect increased productivity, reduced errors, and improved accuracy in your labeling process. This powerful, one-of-a-kind solution is the answer to all your labeling needs.

The TEKaLabel is for cartons measuring:

Dimensions

- Minimum 150mm x 99mm x 25.4mm
- Maximum 648mm x 549mm x 450mm

Weight

- Minimum 99.8 g
- Maximum 36.29 kg

Rate

- Up to 30 per minute

Box Identification

- Box size recognition for dynamic label placement (different sides)
- Existing label detection for optimal label placement (to not cover existing labels)
- The TEKaLabel can even handle odd-sized items

Interfacing

- Built-in interface to host systems
- Full WMS, WCS, ERP interfacing
- Ability to interface with host system for label look-up
- Interfaces with third party shipping systems, as well as FedEx, UPS, and DHL

Printer Modules

- Easy label changes with retractable printer modules
- Utilizes industrial desktop printers for more available spares
- Can use Zebra or Sato desktop printers
- Multiple label sizes
- Up to three modules
- Duplex pack slip option (combined pack slip and shipping label all in one)
