

Henna Chameleon

There are a few videos made for using Inktense pencils and setting bling on my website: www.medinadomarts.com

Materials included in your packet:

One 16 x 16 inch Animals Gone Zen Chameleon and Paper Version for Pre-coloring

Recommended Coloring Materials:

Each pen above is numbered and corresponds to the Excel spreadsheet on the next page. The easiest way to keep track of each color is to label each pen with the enclosed numbered round sticker (included in full kits only). Use the Black and White Version attached to test colors first and to set up a color code chart before coloring on sampler. The Chameleon is tricky to color of all the Animals Gone Zen to color. You must follow the key code for colors in order to get the blend of colors to look right. It also helps to set your pens up in the same order as the picture above. **By the way, please note that at the very last minute, Fabriano Pine pen was included for the very tip of the tail. It is not in the picture above. It is color number 56.**

Bling Kit

Bling Kit (all the stones necessary to bling according to the photo included in kit. Please note that there are just a few extra stones of each color so be careful when handling the rhinestones).

Iron or Mini Iron. The best way to attach most of these stones is with a mini iron preferably one that has a rhinestone tip. A regular iron can be used but may prove to be cumbersome when setting the very smallest stones.

Pair of tweezers for placing the stones. Any tweezer will do but I find that embroidery tweezers or medical supply tweezers at least 4.5" long work the best.

Roxanne's Baste it with the small nozzle for precise glue placement. Although the stones are all hot fix (meaning that the glue on the stone is activated by heat), I found it somewhat easier to put a spot of Roxanne's Baste it glue down, place the stone on the glue then let the glue dry (for about 5 minutes). Then hit the stone with your iron or mini iron. The Baste it glue holds the stone exactly where you want so you can place the iron on it without worry of the stone shifting under the iron.

There is no particular step by step process other than it is easier to color first then place the stones. Make sure to heat set the coloring first before placing stones. The photo included should be the best guide for coloring as well as where exactly to place stones. However, there are detailed diagrams of each part of the design labeled with number associated with a particular stone and pencil for coloring. Please see the Excel spreadsheet printout for the rhinestone name, the size and the color code for each stone. I have also provided a close count of how many stones are used throughout the process.

If you are having difficulty setting the stones (i.e., they don't seem to stick once heat activated) you may want to refer to the VERY DETAILED instructions provided by the following link:

Finally, you can contact me via email at: medinadomarts@aol.com for any questions or if you need additional rhinestones to complete your work of art!

Enjoy!
