

Henna Flamingo Block Coloring and Bling Kit Instructions

15. Gelly Roll Metallic Gold (#551) or Kaiser Gold Metallic
16. Gelly Roll Metallic Black (#549) or Kaiser Black Metallic

The colors are in order relative to the picture to the left.

The flamingo is a wide variety of pinks, dark pinks, burgundy and Orange Pastel colors. In order to create a “color by number” system for the flamingo, I have numbered the picture above with numbers for each pen. I have never colored the flamingo the same so the coloring may look slightly different than the picture provided. Due to limited availability I will substitute colors when necessary. Kit pens will be numbered in order to use correct substitution.

Use the Black and White Version of each flamingo section attached to test colors first and to set up a color code chart before coloring on sampler. In the case of the flamingo you may want to make several copies of the black and white version and color it several times to determine the best color combo. No fabric medium is necessary for coloring this block.

AGZ Block 4 – The Flamingo

Bling Kit – the bling kit for the flamingo is the most complex of the Animals Gone Zen series. The flamingo design has been broken down into sections and labeled carefully with names of stones and the number of stones used in each band.

Bling Kit (all the stones necessary to bling according to the photo included in kit. Please note that there are just a few extra stones of each color so be careful when handling the rhinestones).

Iron or Mini Iron. The best way to attach most of these stones is with a mini iron preferably one that has a rhinestone tip. A regular iron can be used but may prove to be cumbersome when setting the very smallest stones.

Pair of tweezers for placing the stones. Any tweezer will do but I find that embroidery tweezers or medical supply tweezers at least 4.5" long work the best.

Roxanne's Baste it with the small nozzle for precise glue placement. Although the stones are all hot fix (meaning that the glue on the stone is activated by heat), I found it somewhat easier to put a spot of Roxanne's Baste it glue down, place the stone on the glue then let the glue dry (for about 5 minutes). Then hit the stone with your iron or mini iron. The Baste it glue holds the stone exactly where you want so you can place the iron on it without worry of the stone shifting under the iron.

There is no particular step by step process other than it is easier to color first then place the stones. Always place your smaller stones first then the larger stones so that the iron can touch the surface completely. Make sure to heat set the coloring first before placing stones. The photo included should be the best guide for coloring as well as where exactly to place stones. However, there are detailed diagrams of each part of the design labeled with number associated with a particular stone and pencil for coloring. Please see the Excel spreadsheet printout for the rhinestone name, the size and the color code for each stone. I have also provided a close count of how many stones are used throughout the process.

If you are having difficulty setting the stones (i.e., they don't seem to stick once heat activated) you may want to refer to the VERY DETAILED instructions provided by the following link:

Finally, you can contact me via email at: medinadomarts@aol.com for any questions or if you need additional rhinestones to complete your work of art!

Enjoy!
