For centers of flowers: shave a bit of #3 and #6 in a paint palette well and Put about a quarter sized amount of Fabric medium with the shavings. Mix until Colors have dissolved and tint is a deep Reddish orange. Brush mixture in the center Of both flowers. **Also use the mixture To paint the small buds.**

For the petals of each flower, the goal is to make the petals Look different from each other, with the petals in the back Of the flower darker than the ones on top. Therefore, if A number has LT next to it, it means to color the petal lightly With that color. If the # has HVY it means to press down hard to Put deep color on that petal. If # is plain color as usual. TIP: color all the petals first then Brush on fabric medium. Try to keep the deeper color from Straying into the lighter colored petals.

In order to get a nice blended look for the smaller flower, color with the number pencils first, then apply fabric medium towards the center of the flower. Then apply the tinted fabric medium at the center with a light hand and drag residual color from the brush into the other petals. If the color is too dramatically different, dip your brush into plain fabric medium and brush over any sharp color contrast in order to blend the colors better.

VISITOR

FROM

Heaven

For all blossoms: coat each blossom with fabric Medium with brush. With a wet brush, gently Rub brush tip against color #1 pencil tip. Start color From outside edge towards center. The key is to Keep the color as pastel as possible. Please refer to Colored picture for details. Once the petals have been colored, use gel pen #12 To color the centers of flowers.

Use blue and gold glitter gel pens to color words.
 Alternatively, you can color words with #10 and #7.

For coloring the hummingbird follow the pdf instructions "Coloring Instructions for Most Hummingbirds" located on Website: [FAQs/Misc Instructions \(medinadomarts.com\)](https://www.medinadomarts.com) Coloring Instructions for Download. This kit is for the Black Chinned Hummingbird.

When coloring the flowers, color heavily in the center then draw the color out towards end of petals with fabric medium. Color the very center with Gelly Roll Stardust pen. The letters are colored with Gelly Roll pens. You may choose the same colors as the kit (Blue, Gold and Purple) or choose your own.

To color the lettering ombre style:

Start with the lightest color first, then the

second or medium color then the darkest.

Use uneven lines at the intersection of

each color so that there is no distinct end or

beginning between each color. Use colors as

seen in color version.

The bluejay is a bit tricky to color; the easiest way to color

it is to start very lightly and color with both colors first

then darken in areas as seen in the colored photo. Apply

fabric medium being careful not to blend too much between

each color. The beak should be colored dark with #2.

Alternate #8 and #7 for front

of nest. #7 should be used for

all skinny branches while #8 is

the background color.

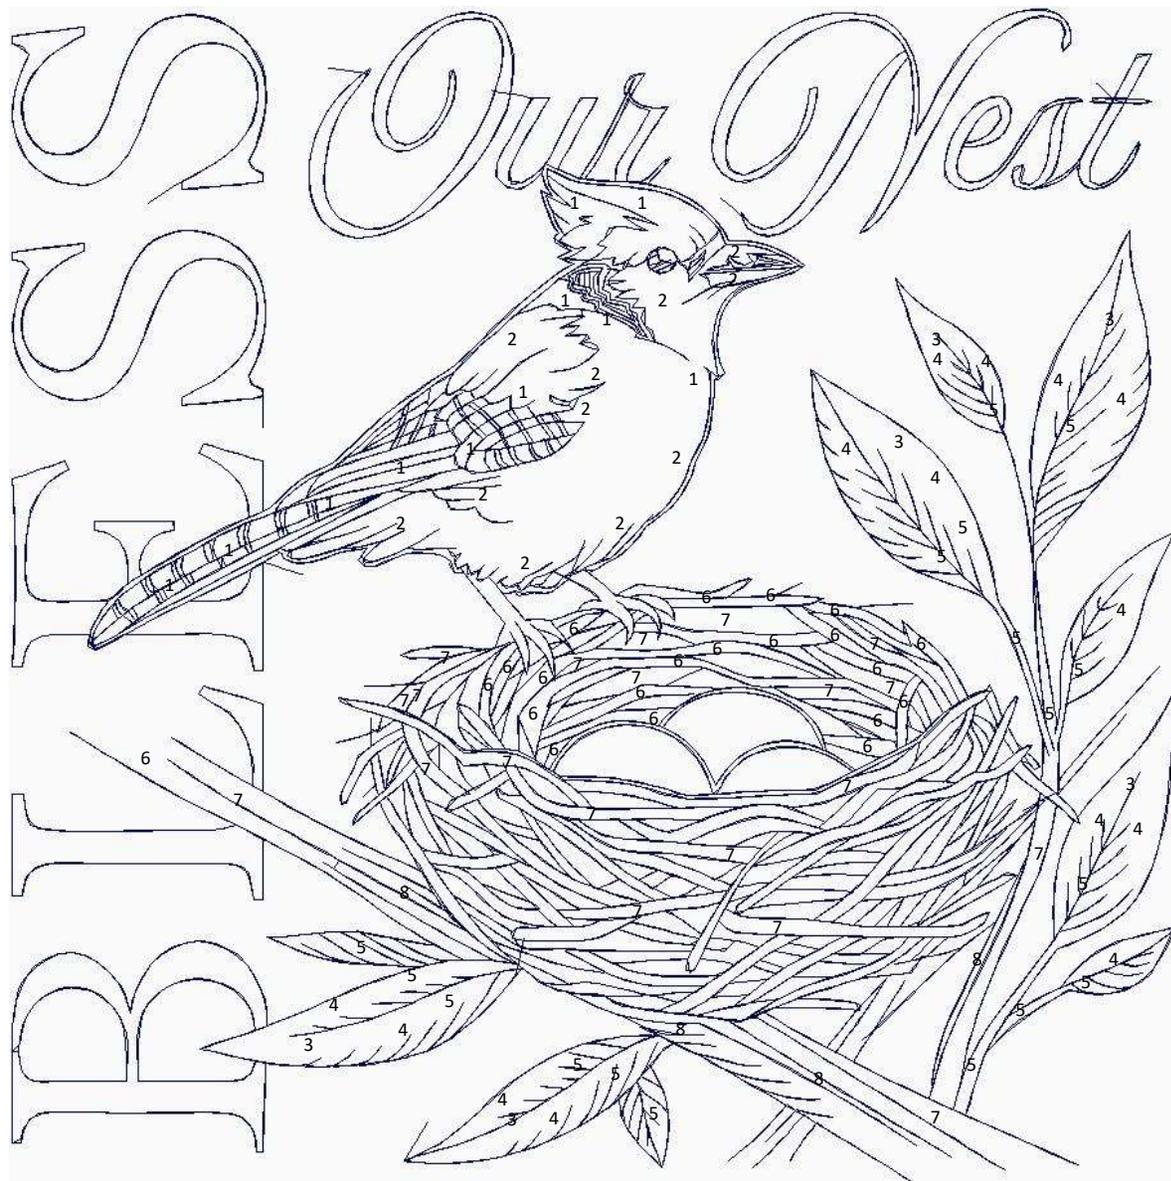

Likewise, the back of the nest should

be done similarly with #6 and #7.

The eggs should be colored very lightly first with #4, then overcolored

lightly with #1. Then at the base of each egg, color lightly with #6. Blend

with fabric medium.

For petals: Outer edges of each petal is colored with #4 and centers of petals are colored with #3. Keep coloring light and deepen only in deep centers of petals. Coloring should become lighter towards outer petals. Blend from lightest color towards darker color so that lighter coloring is not lost. Very center of Peony is #9.

When coloring is designated as 1/2color with first number then over color with second number. Blend together.

Use #7 in butterfly by coloring very lightly inside wings and very darkly on the edges. Blend carefully maintaining shade differences.

Use #5 very lightly inside butterfly's wings below peony. Leave tiny markings white. See photo.
