Countertop Measurements Made Easy!

If you would like for us to prepare a bid for you, we will need some general information from you. We are also more than happy to send a member of our crew out to measure for you.

WHAT YOU WILL NEED:

Paper

Pencil or Pen

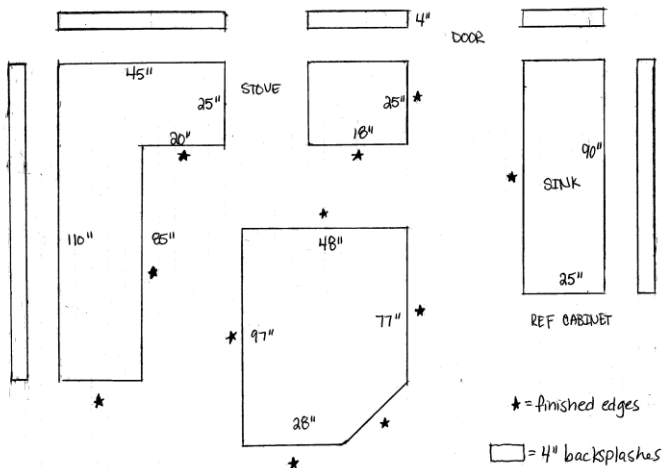

Tape Measure

Camera (Optional)

Just start by sketching the general shape of your countertop space, please refer to the example below. If you have existing countertops, please try to remember to add the thickness of your backsplash to the overall countertops depth.

Using your tape measure, measure in inches the dimensions of all the countertop space you would like surfaced with granite and/or quartz. Put the measurements on your rough drawing as you go. Please indicate the approximate location of any required cut-outs for undermount or drop-in sinks, drop-in cook tops, etc. If you would like a backsplash, please indicate where you would like it by drawing it above the countertop. In order to indicate the finished edges, please use a star shape. Let us know if you have a free standing range, slide-in range or a cooktop. (Pictures of your existing kitchen are helpful.)
