Site Background

The 500-acre Ringwood Mines/Landfill site is in a historic iron mining district in the borough of Ringwood in Passaic County, New Jersey where car parts and paint sludge wastes were dumped on the ground and in abandoned mine pits.

EPA originally placed the site on the Superfund program's National Priorities List (NPL) in September 1983. The site was deleted from the NPL in 1994. EPA placed the site on the NPL in 2006 a second time after discovering more contamination. The selected cleanup action for the Peters Mine Pit Area, Cannon Mine Pit Area and the O'Connor Disposal Area is currently being constructed.
