

ROAD LESSON PREVENTION PROTOCOL

1. If you are sick or experiencing any of the following symptoms, please cancel the lessons (Symptoms may appear **2-14 days after exposure to the virus**):
 - a. Fever or chills
 - b. Cough
 - c. Shortness of breath or difficulty breathing
 - d. Fatigue
 - e. Muscle or body aches
 - f. Headache
 - g. New loss of taste or smell
 - h. Sore throat
 - i. Congestion or runny nose
 - j. Nausea or vomiting
 - k. Diarrhea
2. Please read, print and sign Covid-19 questionnaire/waiver below. To reduce possible exposure please arrive at the lesson by yourself or with your participating child—both wearing masks and rubber gloves if possible. Thanks.
3. You are encouraged to provide your own PPE (Personal Protective Equipment).
4. The instructor will verbally screen your child and mark and sign a separate questionnaire/waiver.
5. If your child has no symptoms, he/she will then enter on the vehicle's driver's side.
6. Masks must be worn when approaching the vehicle, during driving lessons and observations – NO EXCEPTIONS!
7. It is mandatory for instructors to wear masks. The use of disposable gloves is at the instructors/student's discretion.
8. Instructors will disinfect any and all surfaces touched by student before and after each lesson. This includes and is not limited to:
 - a. door handles
 - b. dashboard
 - c. keys
 - d. controls
 - e. shifts
 - f. handbrakes
 - g. levers and seat
9. While in the vehicle use of disposable plastic steering wheel covers, disposable gloves, and ventilation will be enabled.

TIPS FOR CAR CLEANING

If you are using your vehicle to go to work or run essential errands while practicing social distancing, we recommend disinfecting the interior of your vehicle regularly.

WHAT TO USE

Soft cloth or microfiber cloth
Dampen the cloth with soap and water to wipe down the hard surfaces of the vehicle interior. Dry with a clean dry cloth.

Isopropyl Alcohol
Solutions that contain at least 70% alcohol are effective against coronavirus according to The Centers for Disease Control and Prevention. Many interior surfaces of a vehicle can be cleaned with a soft cloth or microfiber cloth dampened with isopropyl alcohol.

Cleaning leather

Many automobile leather and leather-like materials have a protective coating, which is safe to be cleaned with alcohol. However, over time, cleaning leather with alcohol can leave it susceptible to damage and discoloration.

- ✚ An alternative is soap and water to clean spots and spills, followed by the use of a good leather conditioner.

WHAT NOT TO USE

Avoid bleach, hydrogen peroxide, benzene, thinners or other harsh and abrasive cleaners. They will damage your vehicle's upholstery and/or interior surfaces.

Do not use ammonia-based cleaners on the infotainment screen, as they can damage the anti-glare and anti-fingerprint coatings.

WHERE TO CLEAN

- ✓ Steering wheel
- ✓ Key and remote fob
- ✓ Exterior door handles, both sides
- ✓ Trunk lid or lift gate grab areas
- ✓ Interior door pulls, both sides and interior door panels
- ✓ Start button, if equipped
- ✓ Rear view mirror, back and edges
- ✓ HVAC vents
- ✓ Gear selector
- ✓ Turn signal lever
- ✓ Windshield wiper controls
- ✓ Center stack knobs
- ✓ Center console and arm rest
- ✓ Seat belt and buckle.
Avoid harsh cleaners on the belt itself. They can degrade the fibres and belt's strength.
- ✓ Parking brake handle, parking brake or release lever

The infotainment screen is a high-touch area, but not a surface that should come in contact with aggressive cleaners. Use screen wipes which are not anti-microbial, or wipe with a soft cloth dampened with soap and water. Wipe dry with a clean, soft cloth.

- ✚ Avoid touching the center screen, and use your voice commands more often.
- ✚ Remember to wear gloves while disinfecting your vehicle, and try to do so in a well-ventilated area.
