Holzinger
SEED SERVICE

IN FURROW (SEED BOX TREATMENT)

NEXTA SPEEDBOX W/ ETHER	RATE: 1 PAIL PER/45 UNITS (1 SCOOP PER BAG)	PRICE: \$685.00 PER PAIL \$17.35 PER ACRE	Micronutrient blend delivering a high volume Zinc. Contains Terrasym, industry leading biostimulant generating massive roots and Ether Enzyme Technology, a Lipase and Mannanase enzyme and Active Carbon combo increasing microbial activity. 12 Biofertility and N-Fixing Microbes, all in one box treatment with 80/20 Talc/Graphite carrier system.
NEXTA SHIELD	RATE: 8 OZ. PER ACRE	PRICE: \$120.00 PER GALLON \$7.50 PER ACRE	Mitigating abiotic stresses, such as cold, heat, hail, excessive rain, frost and drought. Containing 3% nitrogen, 1% Soluble Potash, 1% Cobalt and 1% Molybdenum. When a plant is stressed it focuses it's energy on survival, not reproduction, which means it's not focused on producing yield. Nexta Shield is proven to minimize abiotic stressers and maximize yield through increased nutrient uptake from improved root system, better emergence and increased nodulation.

POST HERBICIDE APPLICATION

AQUADRAFT EXTREME	RATE: 20 OZ. PER ACRE	PRICE: \$22.00 PER GALLON \$3.44 PER ACRE	Complete adjuvant w/ AMS, surfactants, drift reducing agents, humectants and antifoaming agent
NEXTA SHIELD	RATE: 8 OZ. PER ACRE	PRICE: \$120.00 PER GALLON \$7.50 PER ACRE	Mitigating abiotic stresses, such as cold, heat, hail, excessive rain, frost and drought. Containing 3% nitrogen, 1% Soluble Potash, 1% Cobalt and 1% Molybdenum. When a plant is stressed it focuses it's energy on survival, not reproduction, which means it's not focused on producing yield. Nexta Shield is proven to minimize abiotic stressers and maximize yield through increased nutrient uptake. Improving the root system to promote healthy nodule formation and maximizing nitrogen utilization and supply.
NEXTA SPARK	RATE: 8 OZ. PER ACRE	PRICE: \$84.00 PER GALLON \$5.25 PER ACRE	EPA registered plant growth regulator and yield stimulant limiting yield loss due to cytokinin deficiency. Manages heat stress in all crops and increases lateral branches on soybean plants. The increase in lateral branches assist with more real estate available for flowers and pods to form while assisting with quicker canopy closure.
NEXTA SUPPLY (UTRISHA N)	RATE: 5 OZ. PER ACRE	PRICE: \$33.00 PER POUND \$10.31 PER ACRE	A high-efficiency foliar biological that enables crops to capture nitrogen directly from the atmosphere. By utilizing specialized bacteria to convert nitrogen gas into a plant-ready form, it provides a supplemental nutrient source that fuels growth and protects yield potential throughout the entire growing season.

FUNGICIDE APPLICATION

TRUTRACK FUNGICIDE	RATE: 8 OZ. PER ACRE	PRICE: \$56.00 PER GALLON \$3.50 PER ACRE	Adjuvant helps optimize droplet adhesion, reducing bounce and increase droplet spreading for improved contact
NEXTA SWOLE	RATE: 1 QT. PER ACRE	PRICE: \$40.36 PER GALLON \$10.09 PER ACRE	Nexta Swole increases the rate of sugar transport from leaves to flowers, ears, seeds and pods to increase available sugar and seed size for higher yield. Nexta Swole is an EPA-registered plant growth regulator and yield stimulant containing the active ingredients of .003% Cytokinin, 8% Boron and .004% Molybdenum.
NEXTA SPARK	RATE: 8 OZ. PER ACRE	PRICE: \$84.00 PER GALLON \$5.25 PER ACRE	EPA registered product to fight heat stress. It's a plant growth regulator that delivers a shot of cytokinin right when the crop needs it most. While the fungicide handles the leaves, Spark keeps the plant from 'shutting down' during high temps, preventing flower and pod abortion.

DISCOUNTS AVAILABLE IN 275 GALLON MINI-BULK AND LARGER VOLUME QUANTITIES
