

# ARCHITECTURAL AND BUILDING RELATED FILMS

## AVERY DENNISON FACADE FILM EXTERIOR BUILDING RENOVATION

Avery Dennison Facade Film is a premium quality, comfortable cast film designed to meet the demands of application and exposure on building facades, panels and window frames for restoration, restyling or branding purposes.

With the film having high adhesion onto difficult building substrates such as plastics, aluminium, uncoated/coated steel and reinforced facade panels, it is an excellent alternative to paint. The product offers exceptional value for commercial and residential refurbishments, minimizing downtime due to the ease of application and no drying time, unlike paint and also comes with a life expectancy of up to 10 years.

### THE RANGE

Avery Dennison Facade Film is available in 22 standard colours, with these off the shelf colours covering a broad range to suit your needs. Colour matching is also available.

#### Key Benefits

- Fast, clean and easy redecoration
- Conforms over curved, irregular surfaces for a smooth paint-like finish
- Cost effective solution versus conventional paint
- Minimal disruption and downtime
