

What is Greater Mammoth Creek Community Wildfire Protection Plan (C.W.P.P.)

Many cabin owners wonder what in the world is the C.W.P.P. committee and why do they want the community involved, so I thought I would explain to everyone in our community what it is all about and YES we do want EVERYONE in our community involved.

Wildland fires are a growing community problem in mountain communities, as we all remember the Brian Head Fire that came close to our community and those of us that were still on the mountain had to be evacuated. The firefighters worked diligently to save our community and that is the reason we have established The Greater Mammoth Creek Community Protection Plan.

As members of the C.W.P.P. it is our responsibility to collaborate with State, Federal and Local cooperatives and property owners to migrate wildfire risk. In addition to protecting life and property, wildfire mitigation can also improve firefighter safety as well as help protect our community, critical infrastructure, cultural sites and natural resources.

We are here to document our education programs and projects in our community garnering grant success for our community.

We are the first line of defense for wild fires, therefore we all need to be involved by cleaning our properties by thinning the smaller trees, removing down and dead trees, pine needles, and removing cut firewood away from the cabin and helping our neighbors who need help.

We also need you to fill out your in-kind dollars as this money goes towards our fire department for equipment for our volunteers.

Thank you all for your support in Keeping Our Community Wildfire Safe.

Any question please do not hesitate to call me. Cabin phone # 435-682-3803 Home phone # 702-271-8310 and my Email address: gands130@gmail.com
