

Chapter 4D

Financing of Solar Projects

Kaamil Ansar
Sahar Khan
The Ansar Law Firm

Table of Contents

1. Introduction: Solar Potential	102
2. Solar Technologies	104
2.1 Photovoltaic technology	108
2.2 Concentrated Solar Power (CSP)	109
3. Financing Structures	112
3.1.1 Corporate Financing	113
3.1.2 100% Equity Financing	114
3.1.3 Project Finance	114
3.3 Key Contracts	119
4. Regulatory Supports	120
4.1 Investment-Based Incentives	121
4.1.1 Sovereign Guarantee and Credit Enhancements	121
4.1.2 Loan Guarantee	121
4.1.3 Reverse auctions and tenders	124
4.2 Performance-based Incentives	124
4.2.1 Tariffs	124
4.2.2 Renewable Portfolio standards (RPS)	124
4.2.3 Carbon Credits	126
4.2.4 Renewable Energy Credits (RECs)	126
4.2.5 Net Metering	126

5. Risks	127
5.1 Political Risks	127
5.2 Financial Risks	128
5.3 Environmental/Natural Risks	129
5.4 Construction/Operation Risks	
6. Conclusion	129
Figure 1: Disclosed capex for onshore wind and solar PV projects in 58 non-OECD countries	103
Figure 2: Overview of Solar Photovoltaic Technology	108
Figure 3: Parabolic Trough	110
Figure 4: Power Tower	111
Figure 5: Dish Stirling Engine	111
Figure 6: Concentrating Solar Thermal Power Global Capacity, by Country/Region, 2005–2015	112
Figure 7: Corporate Financing	113
Figure 8: Project Finance	116
Figure 9: Comparison of LCOE for Residential and Utility-scale Solar Projects	118
Figure 10: Key Project Finance Projects and Parties	119
Figure 11: Loan Guarantee Program	122
Figure 12: Renewable Portfolio Standards or Voluntary Targets	125
Figure 13: Renewable Portfolio Standard Policies	125
Figure 14: Currency Mismatch	128
Figure 15: Breakdown of Solar Project Costs	132
Table 1: PV vs. CSP	105
Table 2: Comparison of Solar PV Materials	109
Table 3: Project Finance Considerations	117

Chapter 5

Global Trends in Renewable Energy

Kaamil Ansar
Sahar Khan
The Ansar Law Firm

Table of Contents

1. Renewable Energy/Overview	152
1.2 China	155
1.3 U.S. Trends in Growth	157
1.4 Consumption and Output	158
1.5 European Union	160
1.6 India	160
2. Pricing	160
2.1 Solar	161
2.1.2 Federal legislative action	163
2.1.3 Asset finance and small distributed capacity investment	165
2.1.4 Venture capital and private equity investment	165
2.1.5 Public market investment	165
2.1.6 U.S. Investment	165
2.2 Wind	166
2.2.1 Federal legislative action	168
3.1 Hydropower	171
3.1.2 Federal legislative action	172
3.1.3 Large hydropower (more than 50 MW)	172
3.1.4 Small hydropower (less than 50 MW)	173
Figure 1: Renewable Capacity Growth by country/region (2011-2022)	153
Figure 2: Low carbon sources supplied more than half of UK electricity in 2017	154
Figure 3: China's share in global solar PV manufacturing and demand (2006-2017)	155
Figure 3A: China tariff changes hit solar stocks	156

Figure 4: Renewable Capacity Growth - By type of policy to define remuneration levels (2016-2022)	157
Figure 5: Electricity Capacity Additions by Fuel, 2016	161
Figure 6: Renewable electricity capacity growth by technology (1994-2022)	173

Chapter 17

California

Kaamil Ansar
Sahar Khan
The Ansar Law Firm

Table of Contents

1.1 Summary Economic Indicators	830
1.2 Overview	834
1.3 Energy Sector and Clean Energy Goals	837
1.4 Reduction of Greenhouse Gases (GHG) Emissions	838
2.1 Renewable Portfolio Standard (RPS)	839
2.2 RPS Procurement	840
2.3 Pricing	843
3.1 Solar	844
3.2 Solar PV	845
3.3 Solar Thermal	845
3.4 California Solar Initiative	846
3.5 New Solar Homes Partnership	846
3.6 Net Metering	847
4.1 Wind	848
5.1 Hydro	851
6.1 Geothermal	852
7.1 Biomass	852
Disclaimer:	854
Figure 1: Map of California (Cities)	830
Figure 2: Inflation – Over-the-year percent change in CPI-U, San Francisco, December 2014-December 2017	833
Figure 3: California ISO's Installed Renewable Resources (as of 01/04/2018)	835
Figure 4: California Operational Power Plants October 2017	836
Figure 5: Potential Wind Capacity at 140-Meters Hub Height	849
Figure 6: California – 90m Offshore Wind Speed	850
Figure 7: Edward Hyatt Power Plant on Oroville Dam	851

Figure 8: Wheelabrator Shasta Energy Company power plant in Anderson, California	853
Table 1: California Population Growth Rate (2014-2017)	831
Table 2: California Investment Ratings	832
Table 3: California's Clean Energy Goals	838
Table 4: California Electricity Retailers	840
Table 5: Auction Mechanisms and Tariffs	841
Table 6: RPS Procurement Plan Guidance	842
Table 7: Average Contract Prices for Utility-Scale Solar PV Projects (>20 MW)	844
Table 8: Average Contract Prices for Utility-Scale Wind Projects (>20 MW)	844

Chapter 57¹

Islamic Republic of Pakistan

**Kaamil Ansar
Sahar Khan
Jacqueline Lin
Nicola Liyanage-Don
The Ansar Law Firm**

Table of Contents

1.1 Summary Economic Indicators	2317
1.2 History and Background	2320
1.3 Economy	2320
1.4 Foreign investment	2320
1.5 Security	2321
1.6 Pakistan and the Paris Agreement	2321
1.7 National Climate Action Plan	2333
1.8 Pakistan's Intended Nationally Determined Contribution	2334
2.1 Energy Sector	2339
2.2 Water and Power Development Authority	2341
2.3 Framework under 1994 and 2002 Policies	2344
2.4 China-Pakistan Economic Corridor Project (CPEC)	2346
3.1 Potential for renewable energy in Pakistan	2347
3.2 Development of renewable energy in Pakistan	2349
3.3 UAE (Solar PV & CSP)	2354
3.4 Pakistan	2354
3.5 Public-Private Partnerships (PPPs)	2357
3.6 Prospects for the Future	2358
3.7 Donor Support	2358
Disclaimer	2358

1 Please see the Disclaimer at the end of this Chapter.

Annex I: World Bank Overview of Pakistan	2359
Annex II: Foreign Investors in Pakistan by Sector	2360
Annex III: Recommendations to the Government of Pakistan	2364
Figure 1: Map of Pakistan	2317
Figure 2: Work Program for Climate Compatible Development in Pakistan	2322
Figure 3: Sector Allocation of Expenditures to Climate-Relevant Tasks in the Public Sector Development Program of 2013-2014	2323
Figure 4: Sector Share Comparison of Greenhouse Gas Inventories for Pakistan, 2008 and 2012	2324
Figure 5: Map of Pakistan: major notable thermal, hydro, and renewable energy power stations under construction as of 2016	2340
Figure 6: A multi-year average sum (2000-2012) of Global Horizontal Irradiation (GHI) for Pakistan in kWh/m	2348
Table 1: Projected Greenhouse Gas Emissions by Sector in 2020 and 2050 under Business as Usual Scenarios (in MtCO ₂ e)	2325
Table 2: Climate Change Risks and Suggested Adaptation Technologies in the Energy Sector of Pakistan	2329
Table 3: Climate Change Risks and Suggested Adaptation Technologies in the Water Sector of Pakistan	2330
Table 4: Pakistan's energy mix is based on installed capacity as follows as of June 30, 2016	2340
Table 5: Surplus/Deficit in Demand and Supply during NTDC's System Peak Hours (Actual Data)	2345
Table 6: Surplus/Deficit in Demand and Supply during NTDC's System Peak Hours (Projected)	2346
Table 7: Solar Tariff trends in the UAE (2015-2016)	2354
Table 8: Upfront Tariff for Wind Power Projects	2355
Table 9: Low Head Hydropower up to 25 MW (2014-2015)	2355
Table 10: High Head Hydropower up to 25 MW (2014-2015)	2355
Table 11: Upfront Tariff for Solar Power Projects (2015-2016)	2356
Chart 1: Total Power Generation (MW) by Year and Dominant Form of Energy	2339
Chart 2: Power Sector of Pakistan	2342
Chart 3: Circular Debt in Pakistan	2344
Chart 4: Annual sums of GHI (2000-2012) for Pakistan and Provinces based on satellite estimates	2348
Chart 5: AEDB Development Process	2350
Chart 6: Government of Punjab – Key Development Steps	2351
