

Complete climate control with dehumidification, air purification and ventilation with top efficiencies in heating and Cooling keeping you in complete comfort all year round

ABOUT THE SYSTEM

Features intelligent area motion detection to direct airflow away from occupants and improve energy efficiency, Optional wi-fi controller allows you to control from your smartphone or tablet. It runs efficiently at a low-cost keeping energy bills down.

ENERGY EFFICIENT

Lower energy use,
lower running cost

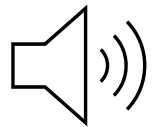

YEAR-ROUND COMFORT

Perfect temperature
in every season

CLEANER AIR

Advanced filtration for
a healthier home

QUIET OPERATION

Engineered for
whisper quiet
performance

KEY FEATURES

	AUTO FAN SPEED	Automatically selects the necessary fan speed to reach or maintain the set temperature
	FAN SPEED STEPS (5 STEPS)	Allows you to select up to the given number of fan speed steps
	3 AREA MOTION DETECTION SENSOR	Airflow is sent to a zone other than where the person is located. Detection is done in 3 directions: left, front and right
	HUMIDIFICATION	Absorbs moisture from the outdoor air and evenly distributes it throughout the indoor areas.
	DEHUMIDIFICATION	Reduces indoor humidity without affecting the rooms temperature, by mixing cool, dry air with warm.
	ECONOMY MODE	Decreases power consumption so that other appliances that need large power consumption can be used. This function is also energy saving.
	24 HOUR TIMER	Can be set to start operation anytime during a 24-hour period.
	INFRARED REMOTE CONTROL	Starts, stops and regulates the air conditioner from a distance.
	AUTO-RESTART	The unit restarts automatically at the original setting after power failure.

BENEFITS

Control your indoor climate from any location via smartphone or tablet

3-D air flow combines vertical and horizontal auto swing for even air distribution

Energy saving during standby mode – current consumption reduced by approx. 80%

Award-winning design

Voice command via alexa or google assistant to control key functions

Automatic filter Cleaning reduces power consumption by up to 25%

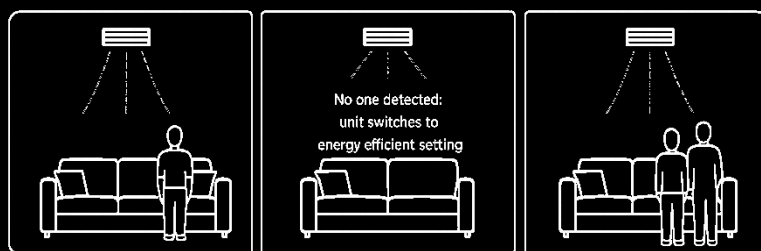

Whisper quiet operations – sound pressure level as low as 19dBA

Seasonal efficiency values: full range A+++ in cooling and

ENGINEERED FOR COMFORT

The 3- area motion detection sensor uses sensors to detect and direct the air away from people to create the perfect air flow. Your system automatically switches to energy-saving mode when it detects an empty room

THE MOST ENERGY EFFICIENT SOLUTION

- Available with bluevolution technology to further reduce your environmental impact
- Powered by 80% renewable energy from the air and 20% electricity
- Inverter technology increases the energy savings by 30%
- 3-area motion detection sensor and eco mode reduces excess consumption
- Automatic filter cleaning reduces power consumption by 25%
