

Like many conferences navigating the COVID-19 pandemic, PEDCO & emersion DESIGN have evaluated the situation and have decided in an abundance of caution to cancel the October 1, 2020 REBUILD Conference. This was not a decision made lightly or without input from our past attendees and sponsors. PEDCO and emersion DESIGN recently conducted an online survey to gauge receptiveness and comfort in attending this year's event.

The following came into play with this decision:

- + The health and safety of all attendees, sponsors and presenters.
- + State and local government may not permit indoor events with attendance over 300.
- + Guests may not feel comfortable attending a large indoor event.

Previously known as the High-Performance Buildings Seminar, the newly rebranded REBUILD Conference strives to create a dialogue that equips leaders to build sustainable value in their organizations. Our mission is to have deconstructive dialogue to advance and restore the region and to prepare sustainable leaders for greater impact. Cincinnati is rebuilding itself to become the premier, sustainable metro region in the nation with an exceptional quality of life - positioning us to lead into the 21st and a half century. The REBUILD Conference has accomplished that mission for the past 8 years and with your help we plan on continuing that mission.

Although REBUILD Conference is regrettably cancelled this year, we will continue our goal of educating our region through our website and social media accounts. Visit our sites below to learn about the latest in sustainable design and resiliency.
