

2023 REBUILD CONFERENCE

CO-HOSTS:

IN PARTNERSHIP WITH:

SAVE THE DATE: THURSDAY, OCTOBER 12, 2023

Communities, companies, and cities alike are looking for a change, a change away from carbon.

With limited resources and unpredictable outcomes, addressing the effects of carbon may appear daunting. As leaders in the built environment, we have a responsibility to spearhead this change and work towards the greater good. By coming together, change is conceivable; we gain the tools needed to address the realities of carbon and rebuild the future. The 2023 REBUILD Conference is your opportunity to **hear from REAL PEOPLE**, investigate **REAL DATA**, and make **REAL CHANGE**. We hope you will join us!

6 AIA/GBCI/PDH Credits Anticipated
