

## Natural Fly Repellant

**Our all natural, non-toxic fly repellant is simple to make. You'll need the following:**

- 1 gallon jug
- plastic spray bottle
- 1/2 gallon of water
- 1/2 apple cider vinegar
- 1/2 cup citronella oil (to repel insects)
- 1 dropper of tea tree oil (for its soothing quality)
- 1 dropper of peppermint oil or lavender oil (to be appealing to horses)
- 1/2 cup olive oil (to prevent fly repellant from dissipating after application)

Pour the 1/2 gallon apple cider vinegar into gallon jug.

Add 1/2 cup citronella oil (DO NOT USE THE TYPE FOR BURNING IN TORCHES!)

Add 1 dropper of tea tree oil and 1 dropper of peppermint or lavender oil.

Add 1/2 cup olive oil.

Shake well.

Add 1/2 gallon of water.

Shake well and pour into spray bottle.

Always shake spray bottle before spraying so that the oils will mix with the vinegar solution.
