GENETIC TESTING INFOSERIES:

Helping health care professionals educate patients about genetic testing

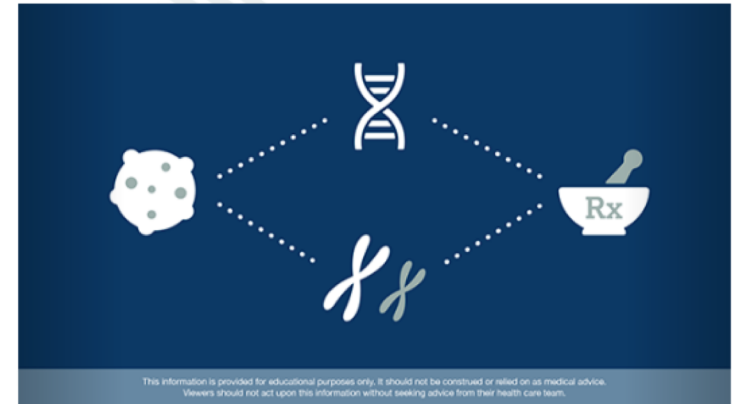

Provide patients with the information they need

This platform is designed to help you educate your patients by sharing short videos on topics related to genetic testing. You can create playlists and share links to them.

- Patients can download the videos to their desktop or watch videos on desktop or mobile devices
- Note that the top two videos, Informed Consent for Genetic Testing: Before the Test, Learn What to Expect and Gene Mutations: Inherited Versus Acquired, will be included on every playlist

We hope that these videos will help your patients to be well informed on key aspects of genetic testing and the role it plays in their care.

CREATE A PLAYLIST NOW!

To watch 4 videos, visit www.cancergeneticstesting.info, then scroll down, click on “Create a playlist now” button and choose ‘Select all.’
