PURPOSE

Pass the PMP® exam the first time! Become a certified project manager! This course is designed to help participants prepare to successfully pass the PMP® exam. It also provides the 35 contact hours of formal project management education that are required in order to be eligible for the PMP® exam.

DESCRIPTION

PMP® is the globally recognized certificate which indicates competence in project management and the ability to lead projects effectively. Through this course, you will enhance your acquaintance with project management practices as defined by PMI® and increase your confidence in PMBOK® knowledge. The course will help you streamline the extensive amount of information required to pass the PMP® exam, hence significantly improving your chances of achieving the certification. Practice test questions, coupled with test-taking tips and strategies from our expert trainers, will ensure that you retain what you learned for the longest duration.

INCLUDED

- * Certificate for 35 training hours
- * Formulas to know for the exam
- * Expert hints and tricks for passing the exam
- * Practice test questions for all sections covered
- * A complete practice exam performed and corrected in the course
- * Hotline with trainer for future questions on PMP® material
- * A supplementary practice exam for the student to solve on his/her own closer to the exam date
- * A training manual containing all the sections covered and represents a summary of the PMBOK®
- * Not Included: A copy of the PMBOK® (6th edition) is not included. It is strongly recommended to have a copy as it is needed for the preparation of the exam.

WHO SHOULD ATTEND

Any project management practitioner planning to obtain the PMP® certification, whether he/she has a title of project manager, associate, coordinator, analyst, leader, or other titles.
