Welcome to our 2025 Sale!

We want to acknowledge our customer's hard work, resilience and dedication to this way of life. The extreme cold temperatures, grasshoppers, drought, wild fires, and higher operating costs have left us all wondering, what's next? Higher prices for our calves have helped. Thank you for your business and friendship. You are so very much appreciated.

Our amazing mother cows continue to be the success factor in delivering healthy, heavy calves in the fall. We continue to appreciate the Red Angus convenience traits. These traits are critical in this unpredictable Montana environment. Our cattle will work in harsh conditions.

We believe the cattle industry must concentrate on balanced traits for their cattle. Here at Westphal Red Angus, that has always been our strategy. We have never chased one EPD over another, and in doing so, we have remained balanced. We believe in balanced traits in birth weight, weaning weight, yearling weight, milk and disposition will lead to consistency in the cows, calves, bulls and into generations of cow families. This is evident in not only our bull battery both AI and natural but also in the multiple generation of VGW females. We believe our balanced approach will work for commercial and registered breeders alike. The strict standards that our cattle were held to in 1976 (when we started our Red Angus herd) are even more stringent today. Our cattle must perform on paper as well as out in the pasture.

Our calves are truly an honest presentation. Meaning, they are parent identified, DNAed, and the bulls are semen checked BEFORE the sale. Structural sound feet are of utmost importance for us, and we believe you have the same requirements. Please know, our cow calf pairs never graze irrigated pasture, our calves are not crept fed, and our calves do not have their feet trimmed. We want you to know what you're getting - a quality product.

The Red Angus cattle are in demand with so many positives in which they contribute to all sectors of the cattle industry. The cattle have taken good care of us and will do the same for you. We are not only purebred breeders; we also sell calves by the pound. We know firsthand that our genetics will work in the "real world" environment. We know our bulls will work on your commercial cattle because we use them on our commercial herd.

Once again, we are offering heifers from the heart of our operation. One of our toughest days every year, is the day we sort heifers for the sale – such hard decisions. You will not be disappointed in the collection of heifers available on sale day and know that you will find them as wonderful as we do.

Vic is always talking about whether an animal passes the "pick-up test." We want our cattle to pass that test – are they physically correct, do they move well, do you enjoy looking at them? We know that you want that as well. We have the high quality and high-performance cattle you're looking for with heifer and cow bulls that pass the pick-up test. Our 2025 bull offering has a strong group of heifer bulls, with the calving ease you are looking for. The strength of our ranch depends on our ability to provide you with exceptional cattle, fresh genetics and reliable up-to-date decision-making information. Your success is our success! We strive to meet your needs and know you will find solution-based cattle at our sale on March 26, 2025.

Our greatest joy has been spending time with our grandchildren. Leah and AJ are growing up so fast (12 and 10 years old). Leah and Axel played basketball this year. Axel had a shorter season (he suffered a broken arm) because of an accident on his motor bike. Leah plays volleyball as well, and Axel played his first year of tackle football. Leah participated in sewing and cooking in 4-H this past year. Leah and Axel are both enrolled in the beef 4-H project and took their second steers to the fair. The steer project is so much work, and we are proud of the job they did. Leah won super steer this year. Axel enjoys shooting sports - trap, sporting clays, and skeet. He has done very well. Leah and Axel also compete in the youth archery league in Lewistown. They are very good help and each have their respective jobs when we work cattle. We are so proud of the young people that they are becoming! Jenni is an intricate part in running the ranch. She continues working as a training and development consultant. Also, Brett and Jenni's ag and steel business, Hedman, Inc. has been a success and provides high quality solutions for the rancher, farmer, fencer, and welder. Trevor works at St Peter's Hospital in Helena. Vic continues to haunt one of his favorite places, the high school gym. Where he coaches high school girls' basketball. Shari had her ankle replaced this fall and is recovering nicely. She loves the ranch, animals, and fiber arts.

We look forward to seeing you! Come check out the cattle and join us for lunch, and continued thank you for your support and business.

Sincerely,
 Vic and Shari Westphal
 Jenni, Brett, Leah and Axel Hedman

- All sale lots are tested BVD-PI negative.
- All registered cattle selling are sire identified.
- Registered sale offering has been GGP-LD 50K tested.

TERMS & CONDITIONS

All cattle sell under the Terms & Conditions of the Red Angus Association of America.

GUARANTEES, TRANSFERS, & CODES EXPLANATIONS

Breeding & specific guarantees – See page 2.
Registration & transfers info – See page 2.
EPD averages & ranges comparison – See page 2.
Codes Explanations – See page 24.

WESTPHAL HERD SIRES - SEMEN SALES

We offer semen on herd sires in our program. Contact us for information and semen pricing on any of our sires.

WESTPHAL BULLS AND FEMALES...

- Are 100% sight unseen purchase guaranteed.
- Are genomically enhance parentage verified.
- Are disposition guaranteed.
- Have been foot rot and wart vaccinated, and tested PI-BVD free.

WESTPHAL BULLS HAVE...

- Free delivery to Montana and adjoining states or rebates for hauling.
- A first breeding season guarantee.
- Passed a semen test and breeding soundness exam by a licensed veterinarian.

WESTPHAL HEIFERS...

- Are guaranteed breeders.
- Buyers eligible for hauling rebates; At cost delivery to central points.

FIRST SEASON BREEDING GUARANTEE - BULLS

Bulls are semen checked by a licensed veterinarian, passed a fertility test, and are guaranteed breeders for the first 60-day breeding season only. It covers broken penis, disposition or genetic structural feet or leg problems, verified by a veterinarian written statement within 14 days of loss of use. We reserve the right to a second option by a veterinarian we choose. Guaranteed doesn't cover injury or loss of use if a bull is turned in with other bulls prior to being turned out at the start of the first breeding season. As full compensation we will provide Buyer a suitable replacement or Buyer will receive credit minus salvage value of said bull, towards purchase of a bull in our next sale.

FIRST SEASON BREEDING GUARANTEE - HEIFERS

Heifers sell guaranteed open and are guaranteed to breed by natural service in the first 60-day breeding season, when exposed naturally to a sire known to be a breeder. If a heifer fails to breed under these conditions, as full resolution, Buyer will receive credit minus salvage value of original heifer, toward the purchase of a heifer in our next sale. Guarantee is void if heifer is used in an embryo transplant or IVF program.

Above guarantees do not cover death. Mortality insurance is available at sale.

RAAA REGISTRY CERTIFICATE

Each registered animal selling will received a transferred RAAA registration paper, following full settlement. Deichmann Livestock completes transfers. Please call them at 406/423-5500 with questions.

The EPD line included with each footnote is the EPD's that lot # has in the top 25% of the breed.

(Spring 2025) RAAA EPD AVERAGES AND RANGES COMPARED TO WESTPHAL AVERAGE EPDs

EPDs are shown with each lot in the sale. The chart below shows the average and range of proven and opportunity sires on the current year RAAA Spring EPD Summary. Also shown are the same for all non-parent animals under two years of age. For your ease of comparison, the bottom highlighted EPDs are the average of our bulls selling in this year's sale. EPDs on each Lot are from the week of Feb. 17, 2025.

The Westphal Program ...

"We have been buying the calves since 1991...We know the results."

Welcome!

Over the past three decades we have purchased thousands of calves sired by Westphal bulls. Feeders report back they're the top genetics they feed; and they purchase the same calves year after year.

The depth of this program is unequalled with cow families represented by as many as 12 generations. That's a bonus of Westphal Red Angus. They're a leader in producing top red feeder genetics, as well as breeding females that work for and adapt to any region of the country. You'll see the results when you weigh calves on shipping day. There's profit directly associated with Westphal genetics. VGW stands behind every bull and female 100% satisfaction guaranteed, as well as on any purchases made on your behalf.

When you're ready to take advantage of DLB's market program for Westphal sired feeder cattle or replacements, give us a call. We're always in the market and stand behind their program. We look forward to visiting with you at the sale.

Sincerely,
Dan Deichmann
Deichmann Livestock Brkg.

SHIPPING DAY

The goal for many commercial ranchers - what they work for year around is high quality feeders that "weigh up". Shipping Day! The test of your cowherd and genetics. It's all measured in weaning weights and quality calves or yearlings to load on the trucks.

Like our commitment to our registered herd, we're equally determined to produce top quality commercial feeder cattle that do a great job when they get to the feedyard. We utilize the same program basics for our entire herd, and know they have production value for all sectors of the industry.

**LOT 1
VGW BONUS 409**

- Bonus is a fitting lead off bull for our sale. You'll travel hundreds of miles in search of a bull this well made, with dominant performance in eight important EPD categories. He has all the stars for performance and carcass proficiency, with the bonus of his stout Dora cow family and his versatility for use on heifers or cows. He has an exceptional smooth profile and deep thickness through his upper and lower quarter.
- 8 top EPD %'s; 1 GM & CW, 3 WW, YW & ADG, 7 ProS, 5 Marb, 14 REA.
- VGW 11 generation dam. MPPA 99.

**LOT 4
VGW SPEAK UP 402**

- Call him a heifer bull or a performance powerhouse, 402 hits the mark for your next herd sire. Style, body mass, structure, and muscle shape combine in this deep-bodied, long striding Declare 2106 son. He’s one of the longest, most correctly dimensioned prospects this year. His daughters will stay in the herd, as he’s bred to be a cowherd builder. His Mercedes 1784 granddam sold a high selling heifer in ‘24 and they’re members of an effective heritage cow family.
- 9 top 25% EPD’s; 11 GM, 22 CED, 3 WW, 2 YW & CW, 1 ADG, 21 MK, 15 CEM, 21 Marb.
- VGW 12 generation dam. MPPA 103.

**LOT 5
VGW LEAD ON 427**

- Stacked performance, milk, marbling and carcass yield all add to amazing production value of this Leading Edge son. Look at his spread and tremendous 123 WR that comes along with frame and dimension. This powerhouse herd sire prospect walks out with authority on a wide base. His calves will optimize these important traits, and his 3-year-old dam sold a top Lotto heifer in the sale last year.
- Outstanding 10 EPD's in the top 10%; 6 ProS, 2 GM & CW, 5 WW & YW, 7 ADG, 1 MK, 4 HPG, 7 Marb, 8 REA.
- VGW 7 generation dam. MPPA 107.

- BW, dam age, Adj WW and projected sale day weights.
- Dam MPPA is cataloged on each lot.
- 15 EPD categories on each bull and 12 on each heifer are cataloged. Top 25% or better EPDs are listed with the percentiles, in bull footnotes. Heifer top 25% or better EPDs are listed in footnotes.
- We did GGP-LD 50K genomic testing on our sale lots. See RAAA website for continually updated EPDs.

A look at our information...

BW – We take birth weights within 24 hours. Circumstances influencing birth include...

- BW influences calving ease by 65%.
- The dam has 60-70% influence on BW of calf. The bull has 30-40% influence.
- Pelvic measurement and angle, and shape of the calf, has 35-40% influence on calving ease.
- Length of gestation greatly affects birth weight.
- Temperature and weather the final 30 days of pregnancy affect gestation length.
- Maturity and size of the dam influences calving ease, especially in heifers.

All traits are relative. Increased growth and performance increase BW. If a calf has genetics for growth, this trait will present both pre and post birth. Continued selection for light BW will ultimately reduce the mature size and performance of cattle. A cow should easily give birth to a calf that weighs 8% of her body weight.

205 ADJUSTED WEANING WEIGHTS

Weaning weights are adjusted to 205 days, and for the age of the dam. Weaning weights primarily provide a measurement of the dam's milking ability, but also indicate differences in growth potential of a calf.

PROJECTED SALE DAY WEIGHT

The bulls were weighed in early February, and from the resulting yearling weights (adj) a projected sale day weight was calculated. They are projected for comparison use only.

PERCENTAGE RED ANGUS

1A - 100% Pureblood Red Angus — registered.

1B - 87% to 99% Red Angus — registered.

Cat II - Any animal that doesn't fit 1A or 1B status

Comm. - Commercial Red Angus - unregistered (no papers).

EXPECTED PROGENY DIFFERENCES

EPDs are a prediction of the difference between the average performance of future progeny of an individual, and the performance of progeny of a theoretical reference animal with an EPD of zero (0). EPDs are calculated from pedigree, individual performance and progeny. EPDs are the only measurement comparable across herds in the same breed.

EPD abbreviations: **ProS**: Profitability & Sustainability; **HB**: Herdbuilder; **GM**: Gridmaster; **CED**: Calving Ease Direct; **BW**: Birth Weight; **WW**: Weaning Weight; **YW**: Yearling Weight; **ADG**: Average Daily Gain; **DMI**: Dry Matter Intake **MK**: Milk; **ME**: Maintenance Energy; **HPG**: Heifer Pregnancy; **CEM**: Calving Ease Maternal; **ST**: Stayability; **MARB**: Marbling; **YG**: Yield Grade; **CW**: Carcass Weight; **REA**: Rib Eye Area; **FAT**: Backfat.

ProS EPD Explained:

ProS EPD, stands for Profitability and Sustainability index. It is an all-purpose index that covers economically relevant traits across all aspects of the beef supply chain from conception to carcass. This index works as a combination of the existing HerdBuilder and GridMaster indexes, which include traits from conception to weaning, and post-weaning to harvest, respectively. The ProS index is expressed in dollars per head born.

RAAA EPDs change weekly:

Epds and percentiles listed here were current on February 17, 2025 when we pulled our catalog information. Updated EPDs, percentiles and accuracies, as well as weights and MPPA values may be seen on any registered Red Angus at www.redangus.org. When the sale offering's GGP-LD 50K information is finalized it is added to the Red Angus base, and EPDs will again update.

Our Average EPDs are above breed average in most categories year after year. See the breed averages and Westphal Red Angus EPD comparison chart on Page 2.

SCROTAL MEASUREMENTS

Scrotal centimeter measurements on all bulls will be available on the sale day supplement.

Thank you

for your attendance and endorsement of
Westphal Red Angus.

We are committed to the pursuit of quality,
problem-free, profitable Red Angus
seedstock and commercial cattle.

COWHERD DEVELOPMENT SINCE 1976.

The past few weeks have made us glad our females are bred for hardiness, mothering ability, calving ease, milk quality, docility and resilience. Each of these traits has been put to the test the last two months. Just a few days ago we headed to the feedyard to sort heifers for the sale. Every heifer has earned her place in the herd and those in the sale are all-around performance females that we're proud to offer. They are easy-keeping females, raised to be top mother cows for the ranches they go to. The genetics are decades in the making with proven heritage bloodlines, high production value and durable longevity. These heifers represent breed leading cow families and the individual females, put simply, "will work".

- The 1924 dam has top EPD %'s of 8 ProS, 6 HB and 3 ST. Her Complete 2071 daughter is stylish, well put together, and has an appealing rib shape, with a broody, feminine look.
- 3 top EPD %'s; 11 Marb, 4 YG, 2 Fat.
- 2470: VGW 9 generation female.

AT WESTPHAL GENERATIONS ARE TURNED, AND GENETICALLY SOUND IMPROVEMENT IS ACHIEVED THROUGH ENTIRE HERD PERFORMANCE.

Improving Red Angus genetics is the realized legacy at Westphal Red Angus. For nearly a half century, continued breed improvement has developed over twenty cow families with proven predictability, stay-ability, milk and maternal traits that rival any program in the breed. Most cow families are generations deep, and some trace back 12-15 generations. Equally as important, bulls from VGW bloodlines are used to strengthen our genetic pool. Likewise, we breed to top sires from programs across North America, further magnifying genetic power in our herd.

We purchased Mindbender from the Beery's Land and Livestock at Vida, MT. His calves are exciting and he has a strong set of sons and daughters selling. He's a very dynamic son of 3SCC Domain A163, and his top performance EPD %'s are in ProS, WW, YW, ADG, MK, HPG, ST, and Marb. His dam is a valuable cow at Beery's, with a female line that's outstanding generations deep. His sons sell as Lots 2, and 40-43 and 3 registered daughters sell.

We purchased Complete 2071 from Berwald Red Angus in South Dakota. He's a heavy made, deep and soggy middled Complete 7000E son out of a young donor female, Berwald Stony 0001. She's a massive female in their herd. He's known for his quiet demeanor, and his sons and daughters are also easy to be around. Sons sell as Lots 9-10, and 48-65, and ten outstanding registered heifers are in the offering.

JKW 001 JUDGE Reg: 4289259 100% 1A

Living up to his billing and his name, Amazing has done a great job with his first calf crop. He carries an extra wide top and large rib and is as eye appealing as he was in '22 when he was purchased by Gill Red Angus, South Dakota. His stats were impressive and his first calf heifer dam raised him from 72 BW to 733 Adj WW, WWR 110. We sure like his sons, and his daughters are giving us beautiful calves. Top EPD %'s: WW, YW, MK, HPG and Marb. A son sells as Lot 69; and one registered heifer is offered.

VGW ATOMIC 226 Reg: 4601417 100% 1A

War Chief is from the Ludvigson Stock Farm program. He has EPD top %'s of GM 8, CED 12, BW 5, WW 15, YW 9, ADG 6, MK 23, CEM 18, Marb 12 and CW 22. He adds loads of middle and depth throughout to his sons. His progeny are long sided with deep quarters. Two sons sell as Lots 70-71.

PRODUCING TOP RED ANGUS CATTLE

Leah and Axel are active in 4-H and are showing steers. They picked out steers last fall and raised them to participate at Central Montana Fair in Lewistown. They showed in the steer show and showmanship, and each of them did very well.

The judge of the show noticed the numbers of Red Angus and Red Angus cross steers and females at the fair. In his comments during the final drive, he mentioned there must be a breeder in the area who is producing top Red Angus cattle and how impressed he was with the quality of the red hided steers and heifers in the show. Several of them were shown by our customers' children or grandkids, as well as Leah and Axel.

RELY ON WESTPHAL RED ANGUS

- Providing dependable Red Angus genetics gives you reputable, high performance feeder calves, and productive replacement heifers that make profitable mother cows.

ONLY THE TOP END SELLS

- Our three pronged goals include a top end bull offering, highly maternal females and heavy "push down the scales" feeder calves. This selection pressure means 50% of the bulls are made steers and fed commercially for carcass data.

NO DATA OVERLOOKED

- Complete data is provided on every lot including EPD's, MPPA, and performance info. Bulls are fertility tested with scrotal measurements.

SALE DAY – COME VIST AND SEE THE VGW COWHERD

- MARCH 26, 2025. Have lunch, walk through the sale bulls and females, and take a look at the cowherd. Call if you can't make it to the sale.

All sight unseen purchases sell satisfaction guaranteed.

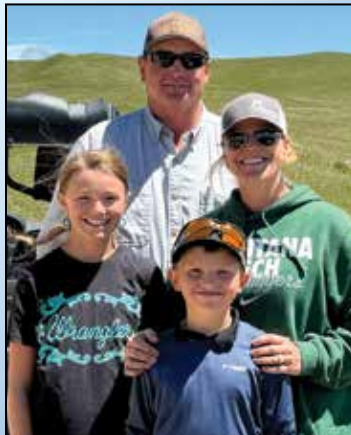

FREE DELIVERY

- Delivery on bulls is free in Montana and adjoining states, OR haul your own and receive a rebate. Details on page 1.

DEICHMANN LIVESTOCK PURCHASING WESTPHAL FEEDERS

- Feeder procurement service to our customers. Over the past 30 years Deichmann Livestock has placed thousands of our customer's calves. They are readily accepted throughout the feeding industry and DLB bids and purchases VGW-sired feeders every year.
