**Welcome to Our 2026 Sale**

***Celebrating our 50th year in Red Angus!***

Welcome to our 2026 sale and our 50th year in the Red Angus business. We want to begin by thanking our customers for your hard work, resilience, and continued support. Despite challenging conditions - from weather extremes to rising costs - your perseverance keeps this industry moving forward. We truly appreciate your business, loyalty, and friendship.

We are honored to have been recognized by the Red Angus Association as Pioneer Breeder of the Year. This award reflects five decades of commitment to the Red Angus breed and would not be possible without the trust of our customers. It reinforces our belief in building cattle the right way - focused on balance, longevity, and real-world performance.

Our program is built on outstanding mother cows that consistently raise healthy, heavy calves. We value the convenience traits of Red Angus cattle and breed them to perform in Montana's unpredictable conditions. Balance has always guided our program - we do not chase single traits or EPDs. Instead, we emphasize soundness, disposition, and consistency across generations. Our cattle must perform on paper and, more importantly, in the pasture.

We present our calves honestly. All are parent-identified, DNA tested, and bulls are semen checked prior to the sale. Structural soundness, especially feet and legs, is a top priority. Our calves are not creep fed, feet are never trimmed, and pairs do not graze irrigated pasture. We want you to know exactly what you are buying.

Red Angus cattle continue to add value across the industry. As both seedstock and commercial producers, we use the same bulls we sell and stand behind them because we rely on them ourselves. We are also offering heifers from the heart of our operations - always a difficult sort, but one we are confident you will appreciate. Vic often talks about the "pickup test" - cattle that are correct, sound, and enjoyable to look at. Our 2026 offering includes high quality heifer and cow bulls that meet those standards, along with fresh genetics and reliable information. We believe you'll find solution-based cattle at our sale on March 25, 2026.

On a personal note, our greatest joy continues to be time spent with our grandchildren. Leah and Axel are growing quickly at ages 13 and 11. Both were involved in basketball this year, with Leah's Jr High volleyball and basketball teams winning district championships. Axel completed his second year of tackle football - which he loved. They also participated in the 4H beef project, taking their third steers to the fair this past summer - no small undertaking. Leah and Axel are active in shooting sports, where Axel has found great success and pursuing the sport at a higher level. They also compete in the youth archery in Lewistown. Leah is also part of the Grass Range FFA chapter where she has been enjoying competing in livestock judging - which has been fun for both Papa and Nana. Both are a tremendous help on the ranch and take pride in their responsibilities. We are incredibly proud of the young people they are becoming.

Jenni remains an integral part of running the ranch while continuing her work as a training and development consultant. Brett and Jenni's ag and steel business, Hedman, Inc., continues to grow, providing high-quality solutions for ranchers, farmers, fencers, and welders. Trevor works at St. Peter's Hospital in Helena. Vic still spends time in one of his favorite places - the high school gym - coaching girls basketball. Shari continues to enjoy the ranch, the animals and fiber arts.

We look forward to seeing you at the sale. Please come early to view the cattle, join us for lunch, and accept our sincere thanks for your continued support.

Sincerely,  
 Vic and Shari Westphal  
 Jenni, Brett, Leah and Axel Hedman

### WESTPHAL HERD SIRES - SEMEN SALES

We offer semen on herd sires in our program. Contact us for information and semen pricing on any of our sires.

## 2025 RAAA PIONEER BREEDER OF THE YEAR

We're proud to announce that Westphal Red Angus, Grass Range, Montana, owned by Vic & Shari Westphal, has been named the 2025 RAAA Pioneer Breeder of the year by RAAA! This honor recognizes longtime breeders who have maintained high standards of excellence, integrity, and dedication in their breeding programs. The Westphals' commitment to "trouble-free" cattle, Strong females, and good herdsmanhip shines through their decades of work. A wise quote from Vic: "Surround yourself with the best cow herd you can and keep making them better. Always stand behind your cattle and what you sell." RAAA congratulates them on this well-deserved recognition.

Red Angus Association of America  
October 2025

## WESTPHAL BULLS AND FEMALES...

- Are 100% sight unseen purchase guaranteed.
- Are genomically enhance parentage verified.
- Are disposition guaranteed.
- Have been foot rot and wart vaccinated, and tested PI-BVD free.

## WESTPHAL BULLS HAVE...

- Free delivery to Montana and adjoining states or rebates for hauling.
- A first breeding season guarantee.
- Passed a semen test and breeding soundness exam by a licensed veterinarian.

## WESTPHAL HEIFERS...

- Are guaranteed breeders.
- Buyers eligible for hauling rebates; At cost delivery to central points.

## FIRST SEASON BREEDING GUARANTEE - BULLS

Bulls are semen checked by a licensed veterinarian, passed a fertility test, and are guaranteed breeders for the first 60-day breeding season only. It covers broken penis, disposition or genetic structural feet or leg problems, verified by a veterinarian written statement within 14 days of loss of use. We reserve the right to a second option by a veterinarian we choose. Guaranteed doesn't cover injury or loss of use if a bull is turned in with other bulls prior to being turned out at the start of the first breeding season. As full compensation we will provide Buyer a suitable replacement or Buyer will receive credit minus salvage value of said bull, towards purchase of a bull in our next sale.

## FIRST SEASON BREEDING GUARANTEE - HEIFERS

Heifers sell guaranteed open and are guaranteed to breed by natural service in the first 60-day breeding season, when exposed naturally to a sire known to be a breeder. If a heifer fails to breed under these conditions, as full resolution, Buyer will receive credit minus salvage value of original heifer, toward the purchase of a heifer in our next sale. Guarantee is void if heifer is used in an embryo transplant or IVF program.

**Above guarantees do not cover death. Mortality insurance is available at sale.**

## RAAA REGISTRY CERTIFICATE

Each registered animal selling will received a transferred RAAA registration paper, following full settlement. Deichmann Livestock completes transfers. Please call them at 406/423-5500 with questions.

**The EPD line included with each footnote is the EPD's that lot # has in the top 20% of the breed.**

## (Spring 2026) RAAA EPD AVERAGES AND RANGES COMPARED TO WESTPHAL AVERAGE EPDs

EPDs are shown with each lot in the sale. The chart below shows the average and range of proven and opportunity sires on the current year RAAA Spring EPD Summary. Also shown are the same for all non-parent animals under two years of age. For your ease of comparison, the bottom highlighted EPDs are the average of our bulls selling in this year's sale. EPDs on each Lot are from the week of Feb. 15, 2026.

The Westphal Program ...

"We have been buying the calves since 1991...We know the results."

Westphal Bulls...Simply Fill the Trucks...

For most ranchers, shipping day is one of the most important days of the rancher's year. And after the gather and haul to the scale, one thing is certain...You want to have the genetics that give you the opportunity (even in a tough year) to fill the trucks. We have purchased calves from Westphal customers for well over three decades. Every year we see length, frame and muscle in the steers which translates to performance in the feedyard. Over 90% of Westphal-bred steers go to repeat feeder customers. The performance is completely predictable and the calves are that good. Each spring and summer the feeder reports come back to us, "We want those red steers again this fall".

If you're new to the Westphal program plan to walk the pens at the sale and see an incredible set of bulls with length, thickness and easy doing, eye appealing set of bulls that have 50 years of maternal and performance traits bred in. And the bonus to this elite program is the females. They make hardy, productive and long-lived cows in every herd they enter.

And to all of you that are repeat Westphal customers, you can always count on a great set of genetics, incredibly females, and our marketing brokerage service is here for you. We'll buy your calves and get them sold well. Call us when you're ready to price them.

Enjoy your day at the Westphal Sale. We guarantee you'll be pleased with the bulls and females in the offering. It's our pleasure to have worked with Vic and Shari and family for over three decades, and to represent their cattle across the country. Join us in congratulating them on their Red Angus Pioneer Breeder of the Year award – truly a most deserved honor.

We look forward to seeing you on sale day. Give us a call if we can assist in any way.

Sincerely,

Dan Deichmann

## SHIPPING DAY- FILL THE TRUCKS

The goal for many commercial ranchers - what they work for year around is high quality feeders that "weigh up". Shipping Day! The test of your cowherd and genetics. It's all measured in weaning weights and quality calves or yearlings to load on the trucks.

Like our commitment to our registered herd, here at Westphal we're equally determined to produce top quality commercial feeder cattle that do a great job when they get to the feedyard. We utilize the same program basics for our entire herd, and know they have production value for all sectors of the industry.

**LOT 1  
VGW DOMINATE 528**

- What an exciting lead off bull that will draw the attention of everyone on sale day. Watch him walk and you'll appreciate his wide stance, depth and thickness. He has loads of muscle with added performance, a 112 YWR from a first calf heifer that did an outstanding job. Webr Declare has worked with either heifers or cows. Mark him a 5-star herd bull prospect.
- Top EPD %'s: GM 15, WW 5, YW 1, ADG 1, MK 10, CW 3.
- VGW 12 generation, 1st calf heifer dam. MPPA 102.

- 508P has been an eye catcher since birth. Watch him walk, and note his wide, level top, his extra thickness and such a complete pattern. A moderate size, he's 3rd heaviest YW, with 113 YWR. A deep quartered bull you'll appreciate on sale day, and his daughters will be replacements. Dam has a great 107 MPPA. His performance EPD's say it all and his sire has WW 3, YW 4, ADG 11 and REA 11 EPD's.
- 508P Top EPD %'s: WW 2, YW 7, MK 8, HPG 16, CW 10, REA 11.
- VGW 12 generation dam. MPPA 107.

- The powerhouses just keep getting better. 590 is a prospect with substantial volume, built with loads of muscle end to end. A milk and marbling powerhouse. The Mindbender sire is a dynamic son of 3SCC Domain A163, and his dam is a valuable cow at Beery's, with a female line that's outstanding generations deep. We're pleased with the Mindbender heifers we retained, and they're developing into top end dams.
- 590 Top EPD %'s: MK 5, HPG 7, Marb 4.
- VGW 9 generation dam. MPPA 104.

50 Years...  
Customer Appreciation*

# EXPLANATION OF CODES

## We provide extensive information on our sale cattle, including...

- BW, dam age, Adj WW and projected sale day weights.
- Dam MPPA is cataloged on each lot.
- 15 EPD categories on each bull and 12 on each heifer are cataloged. Top 20% or better EPDs are listed with the percentiles, in bull footnotes. Heifer top 20% or better EPDs are listed in footnotes.
- We did GGP-LD 50K genomic testing on our sale lots. See RAAA website for continually updated EPDs.

## A look at our information...

**BW** – We take birth weights within 24 hours. Circumstances influencing birth include...

- BW influences calving ease by 65%.
- The dam has 60-70% influence on BW of calf. The bull has 30-40% influence.
- Pelvic measurement and angle, and shape of the calf, has 35-40% influence on calving ease.
- Length of gestation greatly affects birth weight.
- Temperature and weather the final 30 days of pregnancy affect gestation length.
- Maturity and size of the dam influences calving ease, especially in heifers.

All traits are relative. Increased growth and performance increase BW. If a calf has genetics for growth, this trait will present both pre and post birth. Continued selection for light BW will ultimately reduce the mature size and performance of cattle. A cow should easily give birth to a calf that weighs 8% of her body weight.

## 205 ADJUSTED WEANING WEIGHTS

Weaning weights are adjusted to 205 days, and for the age of the dam. Weaning weights primarily provide a measurement of the dam's milking ability, but also indicate differences in growth potential of a calf.

## PROJECTED SALE DAY WEIGHT

The bulls were weighed in early February, and from the resulting yearling weights (adj) a projected sale day weight was calculated. They are projected for comparison use only.

## PERCENTAGE RED ANGUS

- 1A** - 100% Pureblood Red Angus — registered.
- 1B** - 87% to 99% Red Angus — registered.
- Cat II** - Any animal that doesn't fit 1A or 1B status
- Comm.** - Commercial Red Angus - unregistered (no papers).

## EXPECTED PROGENY DIFFERENCES

EPDs are a prediction of the difference between the average performance of future progeny of an individual, and the performance of progeny of a theoretical reference animal with an EPD of zero (0). EPDs are calculated from pedigree, individual performance and progeny. EPDs are the only measurement comparable across herds in the same breed.

EPD abbreviations: **ProS**: Profitability & Sustainability; **HB**: Herdbuilder; **GM**: Gridmaster; **CED**: Calving Ease Direct; **BW**: Birth Weight; **WW**: Weaning Weight; **YW**: Yearling Weight; **ADG**: Average Daily Gain; **DMI**: Dry Matter Intake **MK**: Milk; **ME**: Maintenance Energy; **HPG**: Heifer Pregnancy; **CEM**: Calving Ease Maternal; **ST**: Stayability; **MARB**: Marbling; **YG**: Yield Grade; **CW**: Carcass Weight; **REA**: Rib Eye Area; **FAT**: Backfat.

## ProS EPD Explained:

ProS EPD, stands for Profitability and Sustainability index. It is an all-purpose index that covers economically relevant traits across all aspects of the beef supply chain from conception to carcass. This index works as a combination of the existing HerdBuilder and GridMaster indexes, which include traits from conception to weaning, and post-weaning to harvest, respectively. The ProS index is expressed in dollars per head born.

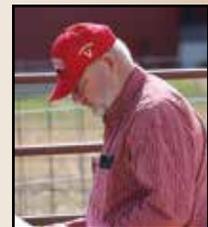

## RAAA EPDs change weekly:

EPDs and percentiles listed here were current on February 15, 2026 when we pulled our catalog information. Updated EPDs, percentiles and accuracies, as well as weights and MPPA values may be seen on any registered Red Angus at [www.redangus.org](http://www.redangus.org). When the sale offering's GGP-LD 50K information is finalized it is added to the Red Angus base, and EPDs will again update.

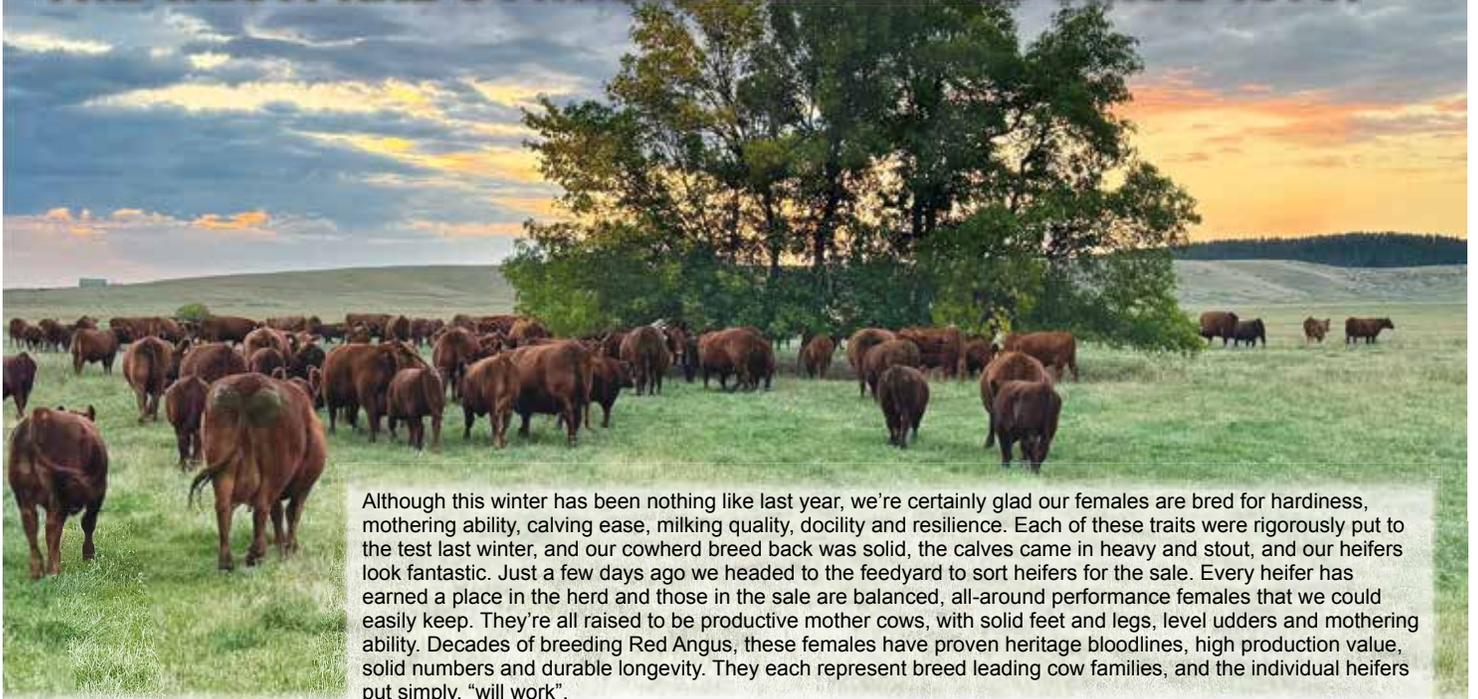

**Our Average EPDs are above breed average** in most categories year after year. See the breed averages and Westphal Red Angus EPD comparison chart on Page 2.

## SCROTAL MEASUREMENTS

Scrotal centimeter measurements on all bulls will be available on the sale day supplement.

# THE WESTPHAL COWHERD DEVELOPED SINCE 1976.

Although this winter has been nothing like last year, we're certainly glad our females are bred for hardiness, mothering ability, calving ease, milking quality, docility and resilience. Each of these traits were rigorously put to the test last winter, and our cowherd breed back was solid, the calves came in heavy and stout, and our heifers look fantastic. Just a few days ago we headed to the feedyard to sort heifers for the sale. Every heifer has earned a place in the herd and those in the sale are balanced, all-around performance females that we could easily keep. They're all raised to be productive mother cows, with solid feet and legs, level udders and mothering ability. Decades of breeding Red Angus, these females have proven heritage bloodlines, high production value, solid numbers and durable longevity. They each represent breed leading cow families, and the individual heifers put simply, "will work".

**WESTPHAL**
