ASC JOINT REPLACEMENT PROGRAM

INSTRUMENTATION STRATEGY

Full Function, Faster®

PROJECT DESIGN GOALS

- Design instrument trays that significantly reduce our overall footprint at ASC's for primary hips and knees
- Design them to be light-weight and compatible with One Tray sterilization containers in size and weight (if desired) and provide supporting documentation
- Provide versatility within trays through pin mat areas
- In order to be lighter, leverage tray manufacturer that has "stackable" design components to be able to "latch" instrument trays together and avoid heavy outer trays
- Design core hip trays that are stem and approach agnostic in order to reduce the number of each approach's unnecessary instruments
- Keep all trays the same length and width

ASC EVOLUTION INSTRUMENT CONFIGURATIONS

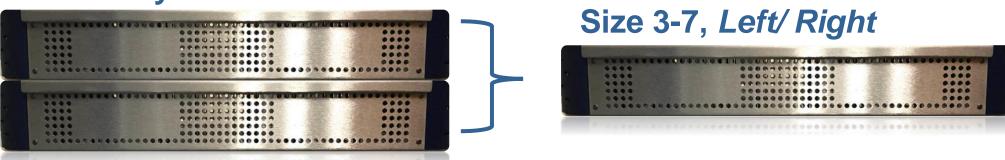

SUMMARY

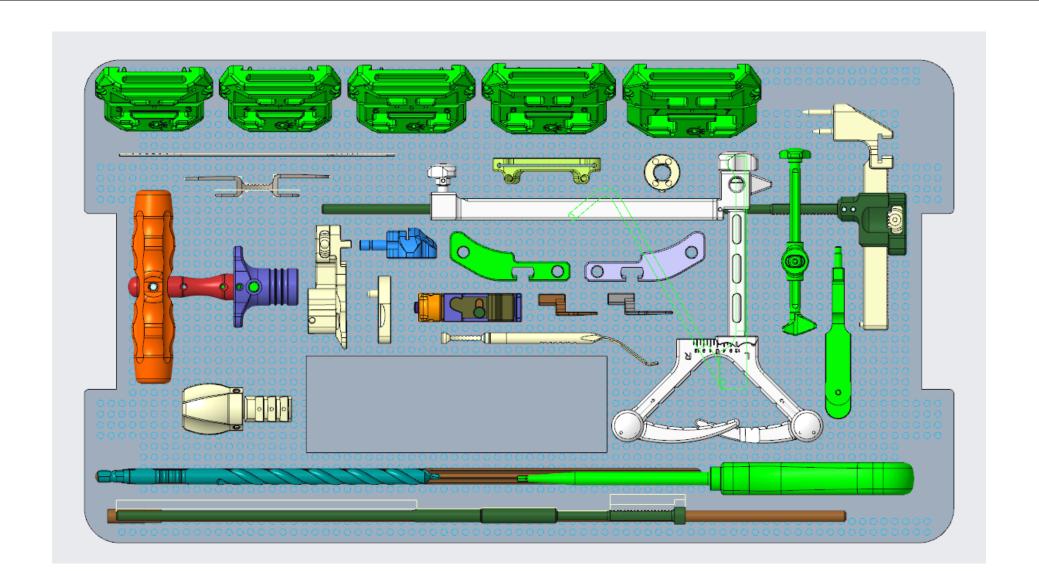

- Only 3 instrument trays for Evolution Knee System
 - ➤ Left or Right
 - > Sizes 3-7 (98% Occurrence)
 - > 10-14mm
 - ➤ Modular 10-14mm Flex/ Ext Blocks
- Outlier size 2 and 8 trays and a 17-20mm spacer block tray offered as account safety net

Core Trays #1-2

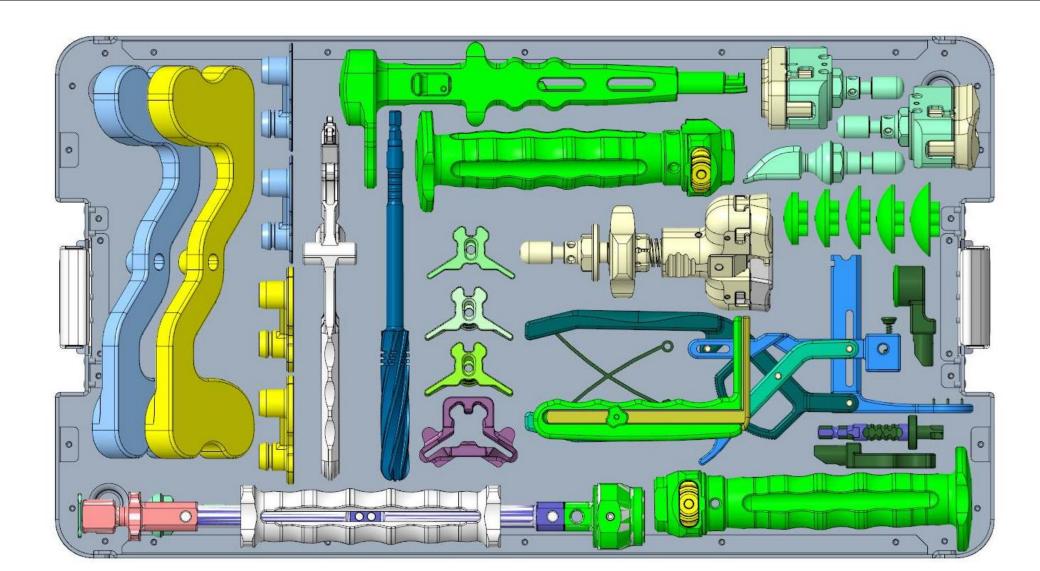

ASC TOTAL KNEE: CORE TRAY #1

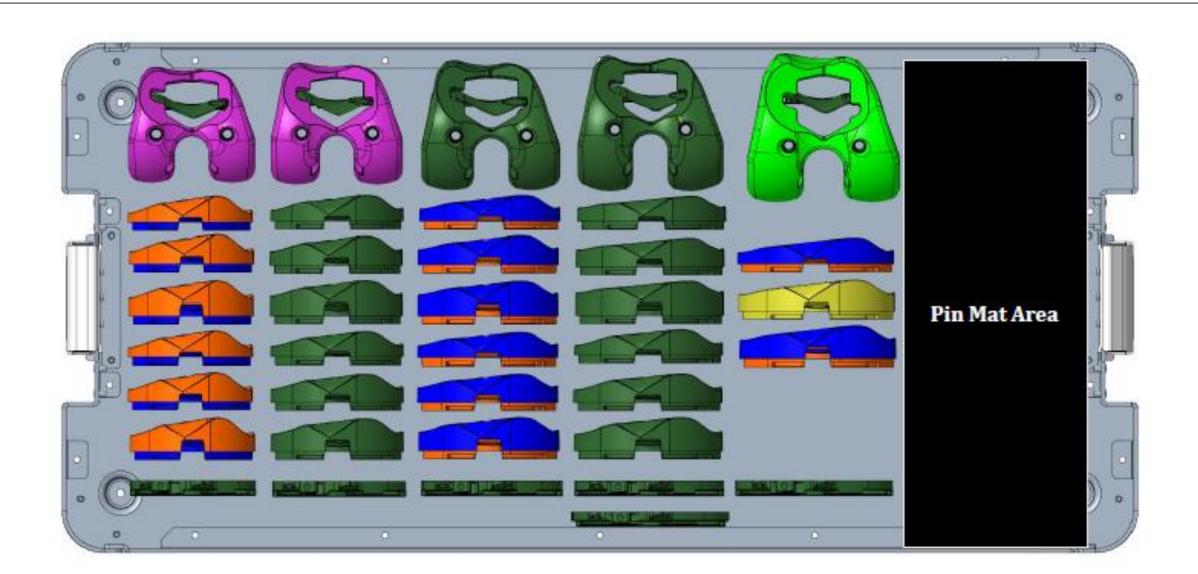

ASC TOTAL KNEE: CORE TRAY #2

ASC TOTAL KNEE: TRAY #3 (LEFT/RIGHT)

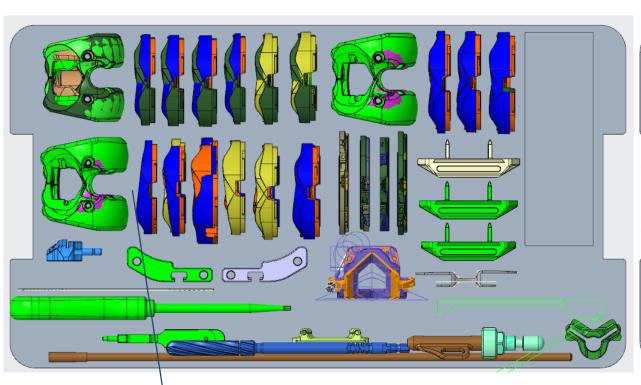

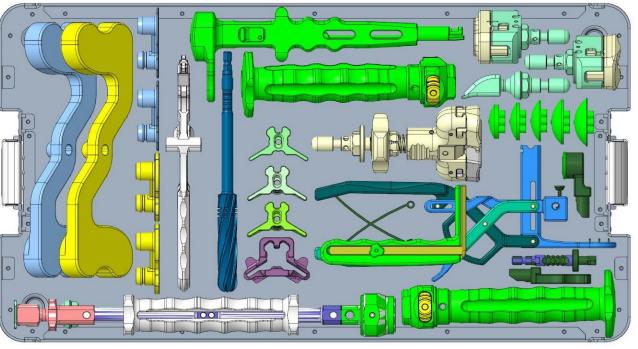

ASC TOTAL KNEE: PROPHECY TRAYS

*Only 2 trays needed when utilizing Prophecy.

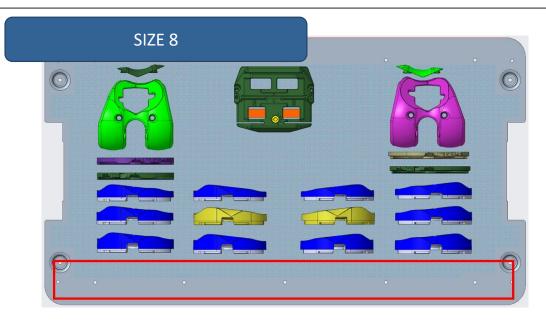

We would send this tray out empty so that it could be built for any range of 2-8 sizes.

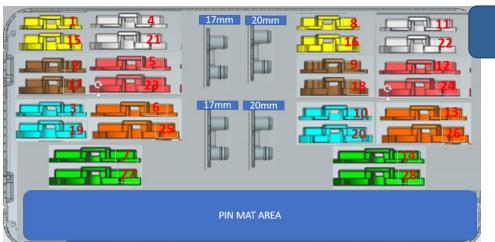

OUTLIER TRAYS

Full Function, Faster®
