

Healthy Skin Balance Requires More Than Progesterone Alone!

Nature works with more than one ingredient and so does The Original Miracle Cream. The added strength of these necessary nutrients, herbs and oils are supported through a cream known by many, to work as an adaptagen.

Easy to use, because there are **no days off**. Because you use it everyday, it is **easy to make it part of your daily routine**. With many other unhealthy and unbalanced progesterone creams you have to count days and take days off. **Other creams are not as natural** and not as effective, as well as not being healthy.

The culture we live in, as well as age, stress and our environment, can cause more than progesterone to become unbalanced or depleted. **Our ingredients help balance problems that our environment and the REAL world cause.**

The Original Miracle Cream is manufactured only as a skin and moisturizing cream and is so safe it falls under the Cosmetic Act and definition.

Years of customer use tells us these ingredients contribute to a more beautiful looking skin; **yet,**

they may also help relieve and reduce hot flashes, night sweats and discomfort. All of these benefits and more in combination with the **most incredible Skin Healing, Conditioning and Moisturizing system**. Many use Miracle Cream at night to **diminish wrinkles**.

Many have spoken to us about Bio-identicals. **We feel we have a superior way of balancing needs** with other benefits! When Bio-identical testing is used it requires office visits, daily reports and note keeping as well as routine visits to the compound pharmacies. This process is expensive and time consuming and never ends. **Many satisfied customers have made the daily use of Miracle Cream their choice to ease the nightmare of hot flashes.**

You should Understand and Know every ingredient in a hormone cream you choose to Trust!

Water-deionized: Primary ingredient in almost every product used by humans from food and drinks to cleansing and cosmetic items. Quality formulas begin with high purity water. Water is easily absorbed through the skin. It is the basis of the best topical transdermal systems.

Glyceryl Monostearate: Obtained from hydrogenated soya bean oil; a normal part of human digestion. Gentle, safe emulsifier slows the loss of water and helps skin cells transport ingredients. Glycerin makes the skin feel softer and smoother, reduces regeneration. Greatly increases the water retention capacity of the fingernails, thus increasing their flexibility and stability.

PEG-100 Stearate: Derived from Stearic Acid; a vegetable derived natural fatty acid that adds a protective micro layer to your skin. Works as

it dissolves ingredients; neutral and low in odor, does not become rancid and seldom reacts with other ingredients.

Wild Yam Extract: Wild Yam does not contain progesterone nor anything else that acts like progesterone.

Aloe Vera Gel: A pure natural ingredient obtained from Aloe Vera plant leaves; soothing, softening and moisturizing properties while balancing and supporting the other ingredients in the formulation. Helps promote healing of dry, damaged skin and hair. True aloe vera is composed of water and thin; the enzyme catalase and cellulose, minerals, calcium, aluminum, iron, zinc, magnesium, sodium, 20 amino acids, carbohydrates, and has mucopolysaccharides, a natural moisturizing factor, and the youth mineral potassium.

Glycerin: A natural plant derived humectant (this means to attract water from the air) to penetrate skin, softening and swelling it, making it water retentive.

Stearic Acid: Stearic acid is one of the fifty nutrients needed to sustain your body's good health.

Safflower Oil: (*Simmondsia chinensis*) is extremely penetrating, rich in moisturizing and replenishing essential fatty acids; soothes the skin; non allergenic dispersant (helps the cream to spread and absorb).

Almond Oil: Contains glucosides, minerals and vitamins and is rich in protein. An oil extracted from the seeds of sweet almonds and used as an emollient (to soften and soothe); contains naturally occurring Vitamins A, B1, B2, B6 and Vitamin E; relieves itch and dryness of the skin. Sweet almond oil has a similar makeup to baby's sebum, the oil naturally produced by the skin to protect itself.

Propylene Glycol: is totally misunderstood **in its natural form; it is a natural product** of fermentation. A powerful antioxidant and is often derived from lactic acid, glucose, or seaweed; an exceptional humectant for maintenance of moisture balance. Aids in solubility and distribution of functional components in formulation; surface-active agent (this means it reduces the surface tension of your skin to allow for better transdermal absorption).

It can penetrate the outermost layer of the skin and carry other beneficial products deeper into the epidermis. Most people are unaware that it turns into water in the body in four hours. Originally derived from brown algae, it has been used for almost a century. Another unknown fact is that it is found in all beers and wines, as well as Mrs. Fields Cookies.

Triethanolamine: Dispersion agent, softening emulsifier, humectant, chelating agent, alkalizing agent (cancels out acids), catalyst for condensation.

Diazolidinyl Urea: Nonanimal complex preservative material which helps control the growth of bacteria and other microorganisms.

Carbomer: Plant derived wax; a thickener that provides a clear gel system for the application of the other ingredients.

Dimethicone: Derived from Meadow form Seed Oil, a foaming agent that aids in moisturizing skin and hair.

Jobaba Oil: From the seeds of the desert shrub "*Simmondsia Chinensis*." Pronounced "Ho Ho Ba" is not an oil but a liquid wax ester with long unsaturated carbon chain just like your skin. It resembles human sebum, the natural coating our body produces to protect the skin. It penetrates quickly into the skin, helping to reduce water loss and helping to deliver other important ingredients in this natural product. Jojoba oil has been shown to effectively reduce superficial facial lines and provide lasting skin softness.

Avocado Oil: A heavy rich penetrating oil, high in sterolins, with 20% essential unsaturated fatty acids; vitamins A, C, D and E, proteins, betacarotene, lecithin, fatty acids, and potassium; one of the most penetrating oils known and has the rare ability to transport active substances into the skin. It exhibits skin healing properties due to its richness in lecithin and high content of oil soluble vitamins.

Vitamin E (Tocopheryl Acetate): A stable form of Vitamin E; it has been shown to reduce skin roughness and fine facial lines and wrinkles; softens skin; acts as free radical scavengers, hindering the oxidizing process.

Chamomile Extract: high in its content of the amino acid tryptophan; has been known to induce

a state of pleasant relaxation without disrupting normal function.

Burdock Root Extract: Soothes and softens; rich in Vitamins B1, B6, B12 and E, plus manganese, copper, iron, zinc, sulfur and more; contains more powerful antioxidants than Vitamin C.

Black Cohosh Root: Used to decrease symptoms such as hot flashes and sweating; effective in decreasing menopausal symptoms in young patients. The world's most famous herb for Women's Health. Use regularly to stay balanced during monthly cycle; promote a natural healthy menstrual flow in the young; useful for treating hot flashes and cold sweats.

Siberian Ginseng Extract: Used for its positive effect in promoting a youthful appearance of the skin.

Progesterone: Plant source of real Bio-identical Progesterone; a certain species of wild yam has a tuber known to have progesterone-like qualities. This tuber is sliced and then put in a vat of acid (the kind your stomach makes). This causes the natural progesterone like molecules to "join" together into bio-identical progesterone. The progesterone is then extracted from the tuber mash. This is real progesterone, molecularly identical to the progesterone your body makes. Progesterone is the main hormone in male and female bodies. Very little of our progesterone is used in the bodies reproductive organs. It takes very little free progesterone supplementation to balance our bodies and help to diminish mild symptoms such as hot flashes.

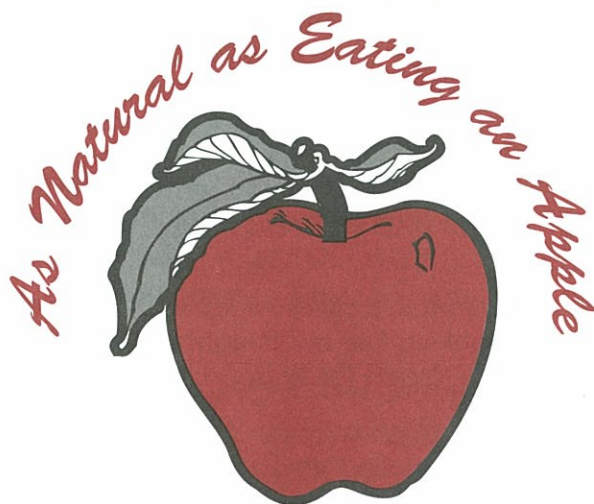

Methylparaben: Natural plant based food-grade preservative; known to come from cherry bark, raspberries, tea, anise and cassia bark. It controls microbial growth. We use it because it is a natural preservative that accomplishes most of the preservative work. In small amounts it is neutral, nontoxic, safe, non irritating and non sensitizing.

Sodium EDTA: (Salt) Full of naturally occurring enzymes that contain transition-metal ions; dismisses unwanted metals which can find their way into food and cosmetics from soil and machinery. Sodium EDTA joins with and ties up the metal molecule so it can't hurt anything, thereby preventing decomposition of a food or cosmetic.

These chelated or "trapped" bits of metal are now in a molecule too big to fit into your cells; they are excreted, having caused no harm.

Propylparaben: Super low dose which comes from Benzoic acid oil, which occurs naturally in cherry bark, raspberries, tea, anise, and cassia bark. In small amounts it is neutral, nontoxic, safe to use, nonirritating, nonsensitizing; an antioxidant, anti-fungal and anti-microbial.

**The Original Miracle Cream
is rich in natural healthy
nourishing ingredients.**

**Yes, it has been proven that
Low Dose is Best!**

What our customers say:

Marjorie of Maryland states:

Skin is soft everywhere I place the cream. I have replaced all my body and hand cream with this rich moisturizing Miracle.

Andrea of Florida states:

She has skin problems and her mother has used the cream and is happy with it. It has been the first thing that she has been able to use on her face. She is a nurse and is hoping that her daughter has the same results.

Marilyn of Texas writes in:

She ordered the cream and is very happy with the results. She is sleeping better and her skin is clearer and better conditioned. Best of all she is losing inches. She loves it!

Virginia of Michigan tells us:

Virginia has seen a real difference with the smoothness of her skin. She is 64 years young!

Valerie from Pennsylvania tells us:

She can see the difference in her skin. Her face is not sagging anymore. She gets up in the morning and can't wait to use it first thing and then again at night. It feels so good.

Lois from Washington states:

She had dry skin which was baggy and flabby. "You truly named this cream correctly. It is my Miracle."

Helen from Washington called to report that because of her dry skin she uses Caress liquid moisture gel at the same time as the cream. This works for her!

Lynn from Tennessee called to report:

I now am looking like my daughter. My husband and I love the cream for all our skin problems.

Frances of Michigan called to say:

I am doing great and enjoying the way my skin feels and looks. Who needs expensive department store face creams. Not me. My miracle is in every bottle.

Carolyn of Rhode Island writes:

The Miracle Cream has worked wonderfully for my skin condition. No more redness or flaky skin. Years of searching and finally an answer. This is great as a skin cream.

Judy of New Jersey states:

HRT left me with brown patches on my skin. The Miracle Cream does amazing things to the skin. It really helped my appearance.

Sharon of Florida called with these words: I can't believe my face and skin. The wrinkles are gone.

Nancy of Alabama says:

I live each day in Thanksgiving for this wonderful cream. My skin is great and the hot flashes are totally gone.

Sherry of Louisiana says:

I love the Miracle Cream. It feels so good on my skin. Especially on my face at night. I love the way it absorbs into my skin.

Katrine of California writes:

I truly love the Miracle Cream. I love the way it feels on my skin. It absorbs better than other products I have used and my Husband loves the fact that my skin is so soft and does not have a sticky feeling. I can't wait to share the Miracle Cream with my friends.

Marie from New York says:

I love the cream for my dry skin and liver spots. It really does the job.

Are these people any different than you?

I don't believe so. **They are just average, everyday people like you and me**, who are excited about the results they have personally seen and are happy to send in their testimonials.

These are just a few of the thousands of people... just like you, who have experienced the deep penetrating, moisturizing, soothing and revitalizing nutrients in every jar of **Miracle Cream**.

These people have been able to ease the symptoms of menopause and erase years of aging from their faces.
