What's in A Name?

The name "Other One" came from Randy Lewis' granddaughter.

At 2 years old she would always refer to a 2nd person with the same name as, "other one". Eric her uncle is simply Eric while his friend Eric is Eric "other one" We thought it was a fun name and we wanted to keep it going as we still refer to people as "otherone" Plus it's an easy name to remember, when in doubt go to the Other One! Some of the beer names came about the same way. Sajulus (rhymes with fabulous) was how Randy's daughter Paige would refer to any one that was looking fabulous because she couldn't pronounce it. We all still use that word today!
