

# ANNOUNCEMENT

We are happy to now offer CNC part programming services. We are specializing in 2-axis contour work. This includes EPS Foam, Routers, Wire EDMs, Plasma, Oxy-acetylene and water-jets.

We can accept most DWG and DXF CAD files.

If you don't have a print, we can scan a picture or take convert an image into a CAD file. We use state of the art Raster-to-vector conversion software (images to DXF). Our files are smooth, utilizing arcs whenever possible. Unlike the segmented mess, most R2V conversion software generates. Here is a list of formats we can convert.

## Graphic Formats

## Reason to try DBS

- 1) Fast turnaround
- 2) Low cost
- 3) 20+ years of CNC knowledge.
- 4) Advanced software
- 5) Reduce overtime
- 6) Supplement manpower
- 7) Resource for tough parts
- 8) Unsurpassed support
- 9) A wealth of postprocessors
- 10) Ability to write new posts

With over 20+ years of CAD/CAM sales and support, we have acquired the knowledge and experience to quickly tackle any part. With a low price of \$45 per hour and most parts taking less than an hour, you can feel confident in giving us a try.

Sincerely;

*Daniel Broderick*
