

# Understanding the Importance of Roof Pitches

The Pitch of a roof is the angle at which the surfaces slope. For an example the roof pitch ratio of 4:12 rises 4 inches for every 12 inches of horizontal roof run.

**1:12**

4.76 Degree

**2:12**

9.46 Degree

**3:12**

14.04 Degree

**4:12**

18.43 Degree
