INTERIOR DESIGN PORTFOLIO

INTERIOR DESIGNER
LATOYA LAW SCOTT

INTRODUCTION

Designer LaToya "LAW" Scott

With a naturally creative mindset, Designer LaToya LAW Scott was born into a world of color and imagination. Over 16 years ago, she discovered her true passion: recreating and designing spaces that not only look beautiful but function with purpose. That passion led her to excel as a successful Software Engineer—while thriving even more as an Interior Designer.

To date, LaToya has transformed over 300 homes and completed 8 commercial spaces, building a reputation rooted in innovation and trust. Her design journey officially began when she was hired by her first residential client—someone who believed in her vision. What started as a \$500 project quickly turned into a \$100,000 design opportunity. The rest of her story is captured inside this portfolio.

At the heart of every project is the belief that an Organizer finds the best solutions to make a space functional, while a Decorator transforms it into something beautiful and livable. Sometimes, those two roles are one and the same—and that's where I come in.

I want the best for my clients—and my work speaks for itself.

LaToya was an absolute pleasure to work with! She completely transformed my commercial space into a stunning luxury nail salon and VIP pedicure club, along with elegant hair studio suites. I never could have imagined it turning out this beautiful. Our clients are in love with the space!

Her attention to detail, creativity, and ability to bring my vision to life exceeded all expectations. From the layout to the finishing touches, every element reflects sophistication and comfort. She was professional, communicative, and dedicated throughout the entire process. I highly recommend LaToya to anyone looking to elevate their space—she is truly a design genius!

Latoya and her crew were professional and talented. They refurbished our home beautifully. Latoya has an eye for design and could picture what we wanted even when we were unable to describe it accurately. My husband and I would definitely recommend Interior Designbylaws to bring new life to your home. We enjoyed the entire experience.
