About Company

A dependable partner for customers and suppliers

GAMA takes great pride in delivering outstanding expertise and superior service.

We design, build and maintain stand-alone and integrated security systems.

We afford full turnkey solutions: defining the customer's requirements, designing and developing the solution concept, selecting the product that best fits the requirements, and completing the installation.

GAMA expertise helps to establish our customers as industry leaders, working with them to build standards and exceed compliance regulations, improve lives and develop greater future economic opportunities. To achieve these goals, we provide commercial, industrial and government clients with a single source of expertise for all their security needs from development and design through installation and ongoing maintenance.

We are a true partner, creating sustainable solutions that exceed expectations both now, and for many years to come. Our experience in a wide range of technology, products and systems, combined with strict attention to design detail, meets the diverse needs of our customers.

We back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge solutions, including :

- 1 Infrastructure Building Management System**
- 2 Protection & Electrical Design / Installation Services**
- 3 Smart Technologies**
- 4 Video Security Systems**
- 5 Fire Security Systems**

Solutions

We strive to achieve world-class standards in delivering quality, reliable, on-time, accurate and customized solutions and services

Solutions

Video Surveillance

A video surveillance system is an essential component of any comprehensive security strategy.

GAMA is pleased to provide the know-how and experience necessary to design, install, service, and monitor a system that will work with your current setup and meet your specific business needs as well as integrate with your existing systems. Whether you want your system to do more for your company or you're just looking for basic local video surveillance systems

GAMA can provide the required solution. An effective surveillance camera system may help any business prevent theft and keep track of and record on-site activities.

Advanced Video Solutions

GAMA can design, install, service, and monitor the ideal video system for your needs, whether it be a standard local video surveillance system or a state-of-the-art IP system with cloud-based storage possibilities.

With our experience, we'll provide the ideal video surveillance system to meet your requirements, such as:

- Options for storing videos on a local, network, and cloud-based
- surveillance via video
- enhanced reporting & analytical capabilities for videos
- Systems for IP and Thermal Cameras

We have the technology to meet your facility's video surveillance needs along with the expertise to install and integrate all the components of your video surveillance systems for simple management, whether you want your system to be wired or wireless adjusted to low lighting, or recording in high definition.

Solutions

Video Surveillance

GAMA Security aims to satisfy your security demands with our highly skilled team of experts and technicians.

We offer internal and external security camera systems, and video management software from many leading brands, including AXIS, Flir, Hanwha, and others

Businesses can easily prevent intrusion by installing dependable security systems.

GAMA Security can create, implement, maintain, and oversee efficient security solutions.

For companies in a wide range of sectors, including commercial, retail, healthcare, banking, education, government, and more .

Our knowledgeable technicians will install a complete intrusion security system that can identify any unauthorized attempt to enter your building and safeguard your assets, property , and people . This system will be built using motion detectors, glass-break sensors, magnetic contacts or sensors and other electronic security devices.

Security systems are essential for both business and residential establishments in today's world. When your property is unoccupied, an intruder alarm is a wise and affordable investment that will provide you with peace of mind.

Solutions

Access Control

Having true access control for your business doesn't only mean preventing access to high security areas. It also means ensuring that employees and visitors can gain access to the areas needed at the right times with minimal barriers. Having effective access control systems in place is one of the most reliable ways to protect your business, property, and company information.

GAMA Security can design and install an access control system that allows people get to where they are needed at the right times, while also preventing unauthorized access to restricted areas.

At **GAMA** Security, our team of security experts have decades of experience designing effective access control systems for businesses in a broad range of industries. With state-of-the-art technologies from leading manufacturers installed by our highly skilled security technicians.

Solutions

Fire Detection System

GAMA provides a proven solution to help you meet your local and national building and fire code requirements. Utilizing code compliant equipment.

GAMA has the expertise to meet the needs of your fire alarm requirements. Protect employees and visitors to your facility and can reduce the risks to your business.

GAMA's Emergency Evacuation solutions combine the detection capabilities of our advanced fire alarm with the capabilities of emergency evacuation to provide a comprehensive life safety system for your building, even for large ones where fire evacuations can be complicated.

GAMA Security provides a variety of advanced capabilities.

When our code-compliant alarm systems detect fires, they will not only alert authorities but also activate the building's life safety evacuation and communications systems.

This can provide a crucial channel between first responders and your building occupants, ensuring enhanced safety for all involved.

Solutions Network Infrastructure

LAN and WAN Solution

GAMA considers deeply the imperative of designing and cultivating a successful network infrastructure that balances flexibility and functionality, reliable connectivity, and cost.

We work with our customers to identify and define their specific needs and goals and then build up the network infrastructure as well as the total solutions. With the successful track record in designing local and wide-area networking solutions, we provide data networking building blocks like routing and switching networking standards like Ethernet, Gigabit Ethernet, as well as networking protocols like TCP/IP, and IPX.

Most likely, your network infrastructure starts with your Local Area Network.

No matter what applications your business runs, your core LAN must be designed for high speed, extreme reliability and ease of management.

We offer a wide range of consulting, design, and implementation services as well as products such as Cisco, HP, EXTREME to ensure that your core network will be sound, robust and scalable.

Our experts, networking consultants and networking engineers, design the most robust and cost-effective depending on your business needs.

We have the skilled people, the adequate technology, and the trusted partners to design, build and manage your networks.

Unified Communications

Unified communications are an evolving set of technologies that automates and unifies human and device communications in a common context and experience. It optimizes business processes and enhances human communications by reducing latency, managing flows, and eliminating device and media dependencies. Unified communications (UC) is the integration of real-time communication services such as Instant Messaging (Chat), Presence information,

Telephony (including IP Telephony), Video Conferencing Data sharing (including web connected electronic whiteboards or Interactive White Boards), Call Control and Speech recognition with non-real-time communication services such as Unified Messaging (integrated Voicemail, e-mail, SMS and Fax).

UC is not necessarily a single product, but a set of products that provides a consistent unified user interface and user experience across multiple devices and media types.

UC allows an individual to send a message on one medium and receive the same communication on another medium. For example, one can receive a Voicemail Message and choose to access it through e-mail or a cell phone. If the sender is online according to the available information.

Solutions

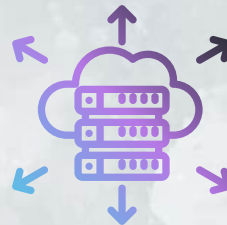

Data Center

A data center houses your network's most critical systems becoming vital to the continuity of daily operations. Consequently, the security and reliability of a data center and its information is not only a top priority, but also ensures an organization's survival in case of any unexpected disaster.

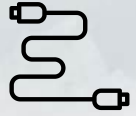

Data center architectures and requirements can differ significantly but **GAMA** can design and implement a robust, cost effective, scalable and highly accessible data center to support your business' needs.

With **GAMA's** experienced team on your side, your business can count on high data availability, security and integrity at all time.

Solutions

Cabling Structure

When your company implements technology before it grows, it frequently discovers that the cable infrastructure design has reached its limit.

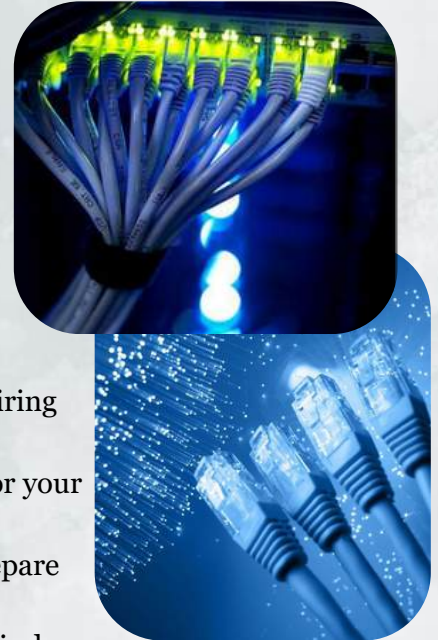

For your organization to function properly, structured communications must be established and speeds must be increased. Cable structure clutter and congestion can be detrimental to the communications infrastructure and the environment in which it is installed.

Implementing solutions for structured cabling is necessary to resolve these problems.

GAMA's certified engineers will design, plan, engineer and execute the wiring foundation needed to meet your current and future needs. From single to multi-point connectivity, we can custom design a cable infrastructure for your organization today that will be scalable for future growth.

If you're thinking about rewiring or reorganizing your current setup to prepare for growth that's well within our wheelhouse too.

Our start-to-finish solutions include data center design, fiber optics and wireless design and implementation.

Solutions Building Management

Building Management Systems

An Intelligent Building Management System is an innovative system that ensures that all your building systems – Illumination (lighting) control, Electric power control Heating, Ventilation and air-conditioning (HVAC), Video surveillance, Intrusion Prevention, Fire alarm system, Plumbing, Lifts and Elevators, Public addressing system, Parking systems all operate in complete harmony. The system co-ordinates and organizes all the information logically and delivers on a 'need to know' basis.

The groundwork for future services is laid by today's intelligent building management systems, which do much more than just serve as an integration platform. When combined with an improved IT infrastructure, an intelligent building management system significantly increases the overall performance and usefulness of the various building systems.

GAMA can help create an intelligent integrated system that provides functionality while integrating all your building system

Every day more cities have the vision to integrate information and communication technologies to analyze what is happening. These technologies and their data help cities make better decisions to improve their efficiency, security, traffic, water supply networks, and waste management, among others.

To collect all this data, the cities need connected sensors integrated with real-time monitoring systems, sources becoming from citizens and devices, and then need to be processed and analyzed.

These information and knowledge are the key to comfortable life style.

and Services

Gama Difference

As a leading provider of global security solutions.

GAMA can offer a thorough security risk assessment that pinpoints the unique security challenges and vulnerabilities of any organization. Our knowledgeable, certified professionals can provide free site assessments to clients.

As a result of working with clients ranging from local stores and small chains to government agencies, we acquired the great experience enabling us to identify security issues for any type of facility and recommend effective solutions.

The **GAMA** team of specialists possessing combined experience in IT and security solution architecture and the dependence on certified systems ensure the trust to deliver integrated software platforms that save business time, money and resources.

Consulting

At **GAMA**, we have years of experience providing complete security solutions to customers across the country. We've invested heavily in keeping up with the latest trends in technology, regulations, and best practices. **GAMA** takes into consideration that every company or organization has unique security challenges and requirements. by performing on-site facility security surveys and discussing your daily business operations. **GAMA** determines precisely the needs of your company affording the assist accomplish your company's commitments and objectives.

Our **GAMA** trusted security advisors will participate with you to develop best-in-class comprehensive security solutions and make recommendations to address security gaps and improve operational efficiencies. We can determine the security risks you face daily and can take the lead to gain your trust.

GAMA will review a variety of criteria, such as available project funding, acceptable risk levels, and ongoing lifecycle maintenance costs, to ensure that your service solution matches your budget and security needs.

Technical Assistance Center

GAMA offers support through our Technical Assistance Center. Call our team through our support line and get technical support and receive help with troubleshooting system issues.

GAMA Technical Specialists are available 24/7 to answer questions on operating your system and to provide minor troubleshooting.

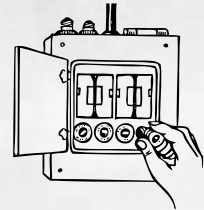

Best Electrician You Can Trust

ELECTRICAL SERVICES TRAINED ELECTRICAL TECHNICIANS PROVIDE

Licensed and trained electricians can provide the following services at residential and commercial properties:

- Electrical set up and rewiring
- Electrical panel installation, upgrading, and replacement
- Whole house surge protection
- Outlet installation and repair
- Ceiling fan installation and repair
- All lighting requirements – fixture installation, replacement, and repair
- Smoke and carbon monoxide detector installations
- Exhaust fan installations
- Pool and hot tub wiring
- Electrical safety inspections
- All electrical maintenance and repairs

Training

Helping your employees and staff to be acquainted to a new security technology is an important factor to establish it.

We cooperate with you to reach the extreme goals of your system.

GAMA can provide training on-site at your company, online, or at our Learning Center training facility.
