

RESEARCH STUDY

UTD THE UNIVERSITY OF TEXAS AT DALLAS
School of Behavioral and Brain Sciences

Purpose of Research

We are testing a program made with and for Hispanic families. It helps young children pay attention, interact with others, join in socially, and build language skills. Our goal is to help families get early education that respects their culture and language, in English or Spanish.

We're Looking For...

We are inviting Hispanic families with children between **18-42 months** who have social communication challenges.

Your Total Time Commitment

- 12 Pathways sessions of 90 minutes (over 16 weeks)
- 3 developmental check-ups for your child at one of the Callier Centers (Dallas or Richardson) or Catholic Charities Dallas
 - 1 check-up before the sessions (~3.5 hrs - 4 hrs)
 - 1 check-up after the sessions (~1 hr)
 - 1 check-up 3 months after the sessions (~1 hr)
- After each check-up, ~1.5 hours of caregiver questionnaires will be completed virtually
- Developmental check-ups help us see how your child is growing and changing with the program
- You will get a report with this information after the check-ups
