

Food Adjustment Preferences

It is not unusual for your dog's weight to fluctuate while in Doggie Camp. Most dogs are not getting 6-8 hours a day of training at home, so this is a lot more exercise than they are used to! For some dogs, it can take a few days to settle in to a new environment so they may not eat as much of their meals. We keep a close eye on each dog's weight from the day they join us all the way up until graduation day. In order for your dog to maintain a healthy weight, sometimes we recommend a few different diet adjustments. Please select your preferences below. These adjustments will be implemented if needed, at our discretion.

If my dog is losing weight, and eating all their food:

- ☐ Increase the amount of food by 1/2c each meal
- ☐ Mix in wet food (\$1/day)
- ☐ Any of the above

If my dog is losing weight, and being a picky eater:

- ☐ Mix in wet food (\$1/day)
- ☐ Add Chicken Broth (\$1/day)
- ☐ Add Nutrical (An over the counter calorie supplement \$15)
- ☐ Add Shredded Chicken (\$3/day)
- ☐ Any of the above

On some occasions, more sensitive dogs get loose stool from being in a new environment.

Dogs can have pepto bismol, just like us! Is it OK to administer pepto to your dog if needed? (\$1/day) YES NO

Please initial here if you do NOT want us to make any of the above adjustments without contacting you.
