After reviewing our records, we do not have a copy of a resume on file for you. However, we do have the initial employment application completed when he was hired for his deputy position. This application includes much of the same information typically found in a resume, such as your work history, education, and qualifications.

Please let me know if there is anything else you need.

Thanks.

So you are confirming that the City of Rosemount does not have a resume on file for police chief Carson Thomas?

Was his hiring as deputy chief an open hiring process?

Why did the City of Rosemount not follow proper protocols in hiring a new chief after the former chief was forced to resign after an internal scandal?

Do you think it was a good idea to hire directly from a dysfunctional police department?

How does the public know if Carson Thomas was the best possible candidate for chief of Rosemount Police Department on merits if the City of Rosemount chose to promote internally from and already dysfunctional department?

Under state statute, you are legally required to provide the resume of Rosemount Police Chief Carson Thomas as it is public data, regardless of how you hired him for the position.

Thank you.

Good Afternoon,

Per your data request, the Chief of Police position was not filled through an open recruitment process rather from an internal promotion therefore we do not have the requested data.

Thank you, and please let me know if you need anything further.
