

Dear Peter Moskaluk:

Congratulations! Your Chemistry course meets the college and university standards for AP Chemistry.

Maintain Authorized Course Status

Please work with schools offering this course to ensure they include it and your organization in their official AP course list in the AP Course Audit platform for the 2026 - 2027 academic year. Courses not selected by an accredited secondary school or homeschool will be turned off and teachers will lose access to AP Classroom after January 31.

AP Course Ledger

The AP Course Ledger lists accredited brick and mortar schools, and/or those sanctioned by their state education agency, that are authorized to use the AP[®] designation on student transcripts, in course catalogs, and on school websites.

Accredited organizations, which can issue school transcripts and diplomas, will have their eligible AP courses listed on the AP Course Ledger under that organization's respective name. Non-accredited organizations must have their eligible AP courses selected by an accredited brick and mortar school in their AP Course Audit account to be listed in the AP Course Ledger along with their organization's name.

Thank you for your continued participation in the AP Course Audit.

Sincerely,

Trevor Packer
Senior Vice President
Advanced Placement Program
