## LEARNING OUTCOMES

- Define risk management and describe different approaches to it, setting the foundational understanding necessary for application
- Apply risk management strategies specifically to the solar project lifecycle, including the stages of development/acquisition, financing, construction, and operation, and articulate the unique challenges and strategies at each stage
- Explain the roles and values of insurance underwriters, risk advisers, and risk managers in the renewable energy sector, particularly regarding their contributions to the sustainability movement
- Analyze the current challenges (headwinds) and opportunities (tailwinds) in the renewable energy sector, understanding its significance in the energy transition and the broader sustainability movement
- Discuss the concept of a “sustainability business model” and its relevance in today’s energy landscape
- Identify immediate, medium-term, and long-term actions that can be implemented to enhance risk management in the renewable energy sector, as well as practices that should be discontinued for better efficiency and effectiveness
