

ONLINE CONFERENCE

Financing Renewable Energy Projects

JANUARY 29, 2026 | ONLINE | CENTRAL TIME

2:30 - 3:15 PM

Risk Management Approach to Enhance Project Resilience

This presentation will explore practical strategies to strengthen resilience across three critical dimensions:

- Property Risk: Continuous risk assessment throughout the project lifecycle, not just at milestones
- Financial Risk: Reducing cost of capital and exploring alternatives to cash or letters of credit for interconnection security deposits and PPAs
- Supply Chain Risk: Looking beyond tier-1 suppliers to uncover hidden vulnerabilities, with attention to political and economic instability

 **T Lee, Strategic Risk and Insurance Advisor, Clean Power Whisperer**
