

Canmore Universal Coolant is a traditional green colored coolant recommended for the cooling systems of older makes and models of foreign and domestic passenger vehicles, light duty trucks and SUV's. Formulated using high quality ethylene glycol coupled with a low silicate additive technology to prevent corrosion and pitting caused by cavitation.

Canmore Universal Coolant provides excellent protection against temperature extremes and boil-over when used in accordance with OEM and product manufacturer's guidelines.

FEATURES & BENEFITS

- Compatible with heavy duty diesel engines with SCA
- Protects all coolant system metals, including aluminum

TYPICAL RESULTS

TEST METHOD	CANMORE UNIVERSAL PRE-MIXED COOLANT
Colour	Green
Density at 15°C	1.0463 kg/L
Freeze Point	-15°C / 5°F
pH	10
Glycol Content	Minimum 27%
Inhibitors & Water	Maximum 73%

SIZES

ORDER CODE

CANMORE UNIVERSAL COOLANT	
4 LITRE	FWW0003025

You should always consult your Owners Manual when selecting any lubricant product. Check with your sales Representative for latest product approvals. Please note, these are typical performance indicators and can change without notice.
