Inspection Preparation

In order to inspect for pest concerns in a unit properly, please perform the following:

- Remove items from the flooring of the closets
- Remove linens from all beds (or technician will have to)
- Remove items from cabinet under kitchen sink
- Do not use store bought pesticides 24-hours prior to inspection
- If monitoring devices are used, please do not touch/move them
- Secure any pets
- Be sure all doors within unit are unlocked/accessible
