Distributed leadership structures within individual schools and across multi academy trusts have never been needed more than they are now as the education sector faces widespread pressures to deliver more with less.

As a CEO, Principal or Headteacher, is your organisation ready to implement or take part in system leadership?

This approach will be powerful in delivering continuous school improvement, but also in providing opportunities to motivate, grow and nurture leaders at every level. To work successfully it will rely on effective middle and senior leaders who are prepared, competent and confident to **LEAD**.

Each online **LEAD** session is delivered through Microsoft Teams and covers:

Leadership focus: The focus this time for Middle Leaders is **Leadership 'v' Management**

Educational context: This focus in relation to practical application, inspection and evidence-based research.

Alliance: Facilitated time to collaborate with other Middle Leaders, share practice and reflect on this focus.

Development: Key take-aways, developmental next steps, facilitator response to any questions submitted.
