

## SpeechSaver™ Automatic Transcription

Transcription is long and tedious work for anyone. Not only does it take time, but it also requires focus and attention to make sure you catch everything. Luckily, the SpeechSaver™ Artificial Intelligence (AI) based technology can transcribe for you. Videos, podcasts, lectures, and all other kinds of audio can be converted into readable text automatically in minutes.

## Voice Recorders

- **Voice Recorder ( Windows )**
  - Standard PC software
  - Allows integration with existing CRM
- **SpeechSaver™ App (Android, IOS)**
  - Runs in the background
  - Works with iPhones and Android
  - Allow you to record meetings and speeches.
- **Hard Phone (Cisco, Grandstream, Yealink)**
  - Dial a SpeechSaver™ service from these phones and start recording.
- **Browser Recording**
  - Bring up SpeechSaver™ on your browser and start recording.

## Cloud or Premise based

Running in the Cloud provides an easily scalable and reliable solution that can be used to process hundreds of hours transcription work.

Alternatively, select providers choose to install the SpeechSaver™ Transcriber on Premise.

Either way SpeechSaver Transcriber features remain the same.

## Features

- User friendly.
- Automatic Transcription
- Extremely fast turnaround
- Speech recognition using the latest Artificial Intelligence (AI) technologies.
- Transcription accuracy for high-quality audio can reach 98.86%.
- Transcribe files of WAV, MP3, M4A, CAF, AIFF, AVI, RMVB, FLV, MP4, MOV, WMV formats, and youtube links without any trouble.
- 1-hour audio/ video just need 3 minutes to transcribe.
- 1 minute of MP3 recordings uses 1 Megabyte of storage.
- SpeechSaver™ recognizes and converts audio to text in 60 languages.
- New languages are added when they become available.
- Speaker recognition and time stamps.
- Very Cost effective.
