

CONDITIONS WE TREAT – SENIOR CARE

MEDICARE

We have many Medicare age patients who enjoy our friendly family like patient atmosphere and our therapies of hot packs, massage, stretching, yoga, exercise and gentle spinal manipulation.

Dr. Hargis has special training in the treatment of seniors and offer the most gentle and effective care possible. For those individuals with arthritis who cannot tolerate a forceful adjustment to the spine, we offer gentle vibration and massage tables that gently stretch and re-align the vertebrae in a comfortable and relaxing manner.

In fact, it's so relaxing that many of our patients must be awakened from their therapy. With experience and training in a wide variety of conditions we can also help senior citizens with their arthritic shoulders, hips, knees, elbows and other areas.

Fortunately, Medicare covers chiropractic care extremely well and will pay for approximately 30 visits per year leaving only a small co-pay for the patient. If you have a supplementary secondary insurance we will also be happy to submit any remaining balance to them as a courtesy to you.
