

Tuition and Program Fee Protection

What is Tuition Secure?

- Tuition Secure helps protect young adults' first major financial investment; the cost of their higher education.
- Tuition Secure is available to four year colleges and universities that would like to sponsor a tuition refund insurance program to protect their students (or parents) in the event of withdrawals from school for medically necessary reasons.
- Covered conditions include sickness, injury, mental/nervous conditions, alcohol/substance abuse and death. Additional benefits are included to cover off-campus housing expenses and private student loans in the event of a medical withdrawal.

Why is Tuition Insurance Needed?

- There is a growing trend in medical withdrawals from institutions of higher learning.
- Recent studies suggest a growing prevalence of students are suffering from moderate to serious psychological distress.
- Refund schedules are generally unknown or misunderstood by both students and parents and generally provide no refunds after the first few weeks of an academic term.

How Does Sponsoring Tuition Secure Benefit Your School?

- Having a tuition refund insurance program available for your students increases the likelihood that students withdrawing due to medical reasons will ultimately be able to return for future academic terms once they are well enough to do so.
- Tuition Secure enables your school to streamline its medical withdrawal process by reducing or eliminating the need to make special individual considerations, which can be an administrative burden, costly and time consuming.
- There are no costs to your school to sponsor a Tuition Secure for your students and implementation is simple.
- Tuition Secure is more flexible from the benefits, enrollment methods, terms/conditions and cost standpoints than other tuition insurance products available in this market.
