

# "TAKING OFF"

Catalina Radio Control Modelers (CRCM) is chartered by the Academy of Model Aeronautics (AMA). We are dedicated to the sport of model aviation. Our main objective is to help anyone interested in model aviation achieve his or her goals. Our motto is **"Flying, Fun & Friendship."**

We are located in Northwest Tucson. Our members enjoy unlimited access to a superb flying site.

Our club is open to the public. In order to fly at our field as a guest, a current AMA membership is required.

## Introductory Pilot Program

We participate in the AMA Introductory Pilot Program. This program introduces the non-AMA member to aeromodeling while providing liability insurance coverage to the non-AMA member and the chartered club. New pilots can fly with an instructor without having to join AMA or the club for up to 90 days!

## Flight Instruction

Our club offers free flight instruction for airplanes, helicopters, gliders, and drones. Our comprehensive curriculum makes competent and safe pilots out of our students. Instruction can be completed with our club trainers or your own aircraft. Advanced flight training is also available.

We also offer help with building, or assistance with any aspect of this wonderful hobby.

CRCM has several trainer aircraft, five AMA-certified flight instructors, and three additional CRCM instructors who can help you to learn to fly safely. They can also help you with the selection of a model and necessary equipment to get you started.

a 231 ft shaded Ramada area with three solar-powered 12-volt charging stations. We have recently improved our field to accommodate large model aircraft.

## Visitors are always welcome!

The best time to visit is on a weekend morning between 8:00am and noon, but there are usually people flying every morning, weather permitting.

We invite you to join us at our fun flies, night flies, and social functions during the year. There are also several float flies at some beautiful Arizona lakes. Yes, some of these planes can fly off water!

## Information

**Flight instruction is available by appointment.**
