

The Unitarian Universalist Act of Immediate Witness adopted in 2024 calls on Unitarians to show solidarity with victimized Palestinians. One thing that would help them enormously would be to get states to stop investing in Israel.

Connecticut Governor, Treasurer and Legislature

Sell Off the Investments in Elbit

The Israeli government which is widely recognized as guilty of the international crime of apartheid is committing the crime of genocide in Gaza and since October of 2023 has killed hundreds of Palestinian civilians in the West Bank.

The Connecticut Treasury has over \$113,000,000 invested in Israeli companies and State of Israel Bonds. That's up from \$85 million in just three years.

The Treasury has over a million dollars invested in Elbit, Israel's biggest weapons company, which has made drones that are implicated in several massacres. [Elbit produces](#) cluster munitions, weaponized white phosphorus, and flechette projectiles. The use of these weapons is prohibited under a 2008 international treaty signed by 111 countries.

See this petition about Elbit:
