Enlighten your life, Empower your self

Introduction of ICE

ICE is unique as it involves the most advanced *neurocognitive assessment instruments* to ascertain the aptitude by sensing Cognitive Process, Nervous Equilibrium & Emotional Intelligence as well as Extra Sensory Perceptions (ESP). Outcomes are put together to draw clear functional imagery of a future professional.

Objective

“Career Path Security”

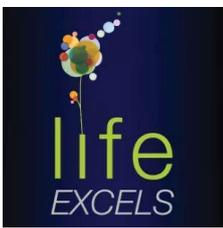

This is exactly what we stipulate at Neurocognitive Development. Institutions must evolve such a system that brings out inner self of an applicant to be judged on the parameters of our communal requisites because we really require capable professionals & we want them for ourselves & for our society.

Enlighten your life, Empower your self

LE realizes the fact that stakeholders to the individual's wellbeing including institution, parents & faculty complement each-other to ensure "career safety" & success.

It simply helps by empowering the stakeholders to establish clear stance and take unambiguous decision towards future career of pupil.

An individual can only become a successful professional if "allowed" to work in accordance with its natural aptitude. **ICE** helps here!

Cumulative Social Impact (CSI)

This initiative is designed for long-term social reaps. Its unique assessment techniques & quality authentications are bound to earn "career insurance" for pupil. Let's see what we get:

What a student earns?

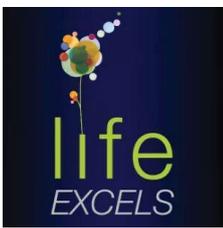

- Career Security
- Specialized Training in Predestined Field of Natural Aptitude
- Accelerated Performance
- Psychosocial Health
- Wellbeing & Contentment
- Guaranteed Success
