Irish be with you!

Ale Nano High Resolution “All in One Box” ~

- Systems of the Nano Series are self-contained printers, also referred to as “all-in-one-box” systems: wide 5” touch screen display, controller, ink-system and print-head all gathered in the same enclosure.
- They are the most compact solutions of all our product range, and are made of highly resistant materials.
- The main advantage of these models is the speed of installation: switch them on and they will be ready to print in just few minutes!
- Nano-Series combines the best qualities of ALE print-heads as well as the Master-HD!

Ale Nano High Resolution “All in One Box” ~

- They can print on both porous and non-porous surfaces using either oil-based fluids or solvent-based fluids. There are also two different models of the Nano series: one for side-printing only (Nano18) and another one, supplied with umbilical cable, for printing top, bottom or with an angle (Nano18R).
- They are integrated with the same user-friendly menu as other controllers and also work with Codex Design Software. They can be connected to TCP/IP or Wi-Fi networks.
