Moisture/temperature sensor cable for all models is 18/5 SOW, 0.485 OD.

Standard motor power/sensor cable length is 30'.

IMPORTANT!

- A) Moisture and temperature sensors must be connected to validate the UL listing and the Barnes warranty.
- B) A special moisture sensor relay and test circuit is required in the control panel for proper operation of the moisture sensors, refer to Section A for more information. Contact Barnes for information concerning moisture sensing relays for customer supplied control panels.
- C) A 1.25" for a 1.25" discharge non-sparking break away fitting must be used to validate the UL listing also, where pump discharge is piped in rigid for permanent installation, power cord must be installed in rigid conduit connected to pump to validate the UL listing.
- D) These pumps are Underwriters Laboratories Inc. listed for pumping water and wastewater. Do not use to pump flammable liquids.

- 1 Above models include moisture and temperature sensors as standard.
For additional cable lengths see next page.

See Accessory Section for control panels and other accessories.
