# THE FUSION COLLECTION

# *Matthew Wailes (London) Ltd*

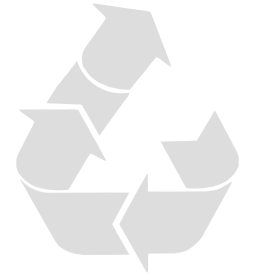

With more than 30 years' experience working with interior designers, decorators and architects, Matthew Wailes is renowned for designing, producing and installing the finest handmade carpets and rugs for high-end residential and commercial clientele.

# Transforming the way we live

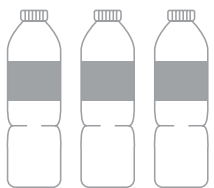

Every day vast quantities of used plastic items are discarded into the world's oceans, buried into the earth or burned releasing toxic fumes into the air.

**The Fusion Collection** focuses exclusively on the removal and regeneration of clear plastic waste from our natural environment. Our unique fibre is produced by transforming this waste into soft, silky, durable yarn – spun, dyed and woven into the production of every material component of the collection.

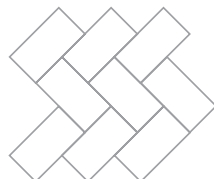

Among the plastic debris responsible for the death of millions of marine animals each year, plastic bottles pose a particular threat; millions are used around the world every minute and it is thought that the majority are discarded and fail to be recycled.

## Product Creation

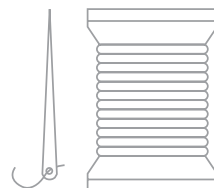

Creating the conditions for a circular economy of plastic waste is an obligation now more than ever.
